This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

UBS EUR AAA CLO UCITS ETF, class hGBP dis (ISIN: LU3028243718)

a sub-fund of UBS (Lux) Fund Solutions SICAV

This fund is managed by UBS Asset Management (Europe) S.A., a part of UBS AG.

Objectives and investment policy

The UBS EUR AAA CLO UCITS ETF sub-fund aims to provide investors with a total return, taking into account both capital appreciation and income returns by investing in AAA-rated collateralized loan obligations.

This sub-fund is actively managed and uses the J.P. Morgan European Collateralised Loan Obligation Index AAA sub-set (€-CLOIE AAA) as a reference for portfolio construction, performance comparison and risk management but is not constrained by it. The majority of the sub-fund's securities will be components of the benchmark.

The return of the fund depends primarily on the development of interest rates and creditworthiness of the issuers and the interest income. The return may also be affected by currency fluctuations, where active or unhedged positions exist.

This class distributes its net income in order to maintain the maximum tracking accuracy of the J.P. Morgan European Collateralized Loan Obligation AAA-only Index.

Risk and reward profile

Further material risks

- Investment in fixed income securities are usually considered as carrying credit risk (i.e. potential loss due to failure of issuer).
- Every fund reveals specific risks, a detailed and comprehensive list of risk descriptions can be found in the prospectus.

More about the risk category

- The risk category is based on the estimated future volatility of the fund. The method used for this estimate depends on the fund type and historical data.
- Historical performance is not a reliable indicator for future performance.
- The risk category allocated is not static and may vary over time.
- Allocation to the lowest risk category does not mean that an investment in this fund is free of risk.

Why is this fund in this Category?

The fund is in risk category 3 because the volatility of its returns is low. The fund invests in bonds and may therefore be subject to volatility. This requires corresponding risk tolerance and capacity. The value of a unit may fall below the purchase price. Changes in interest rates have an effect on the value of the portfolio.

Charges

The charges you pay are used to pay the costs of running the sub-fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest¹

Entry charge	0.00% ²
Exit charge	0.00% ²

Charges taken from the fund over a year

Ongoing charges	0.28%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	none
-----------------	------

¹ This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

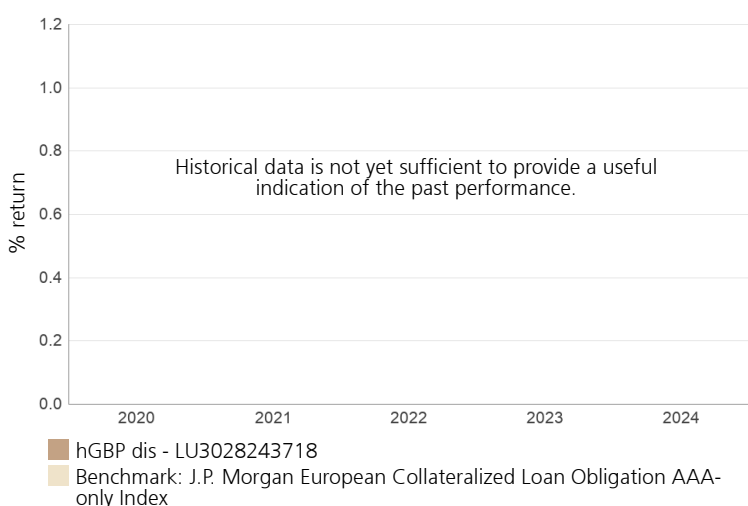

² Investors who deal on secondary markets will pay fees as charged by their stock brokers. These fees are publicly available on exchanges on which the shares are listed and traded and may also be obtained from the relevant stock brokers.

The **ongoing charges** are estimated in the absence of historical data or when the calculated figure is considered unsuitable because of a material change. As soon as available or suitable, the calculated ongoing charges are reported and may differ from the estimate. They generally exclude:

- Portfolio transaction costs, except in the case of an entry/ exit charge paid by the sub-fund when buying or selling units in another collective investment undertaking

For more information, please see the charges section of the Fund's prospectus, which is available at www.ubs.com/etf.
