What is this product?

Type

Shares of a sub-fund of Fidelity UCITS II ICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS).

SFDR product category: Article 8 (promotes environmental and/or social characteristics) - ESG Target.

Term

This fund is open-ended. The Management Company is not entitled to terminate the fund unilaterally, however, the board of directors of Fidelity UCITS II ICAV may terminate the fund by way of liquidation or merger.

Objectives

Objective: The fund aims to achieve income and capital growth.

Investment Policy: The fund invests in a portfolio primarily made up of debt securities denominated in USD issued by governments and government agencies of emerging market countries.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of the Benchmark.

The fund may use derivatives for efficient portfolio management and currency hedging purposes.

Investment Process: The fund is actively managed and references the Benchmark (as defined below) as part of its investment process.

The fund uses fundamental research and quantitative techniques as well as its own ESG assessment to select securities which are weighted with a view to delivering positive returns relative to the Benchmark and improving the portfolio's overall ESG score.

On an ongoing basis, the fund will consider a wide range of environmental and social characteristics such as carbon intensity, carbon emissions, energy efficiency, water and waste management, biodiversity, product safety, supply chain, health and safety and human rights.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex sections of the Prospectus.

Benchmark: JP Morgan ESG EMBI Global Diversified Index (the "Benchmark") Used for: investment selection, risk monitoring, performance and carbon footprint comparison.

The Benchmark tracks emerging market fixed and floating-rate debt instruments that are denominated in US Dollars and issued

by sovereign and quasi-sovereign entities. The Benchmark applies ESG screens as part of its methodology. The fund holds a portfolio of securities which is systematically selected and managed with the aim of outperforming the Benchmark; however, the Investment Manager will only invest in securities which are part of the Benchmark and will consider the Benchmark, when selecting investments for the fund and for the purposes of monitoring risk.

While the fund invests in securities included in the Benchmark in different proportions to the Benchmark, the Benchmark constituents are generally representative of the fund's portfolio. This means that both the fund's portfolio and performance is unlikely to vary significantly from those of the Benchmark, however the fund aims to outperform the Benchmark over the long term.

Base Currency: USD

Additional Information: You may sell (redeem) or switch some or all of your shares to another fund on any Valuation Day.

Income earned by the fund is reinvested in additional shares or paid to shareholders on request. This key information document describes a sub-fund of Fidelity UCITS II ICAV. A separate pool of assets is invested and maintained for each sub-fund of Fidelity UCITS II ICAV. The assets and liabilities of the fund are segregated from those of other sub-funds and there is no cross-liability among the sub-funds.

Intended retail investor

This product may appeal to investors with a basic knowledge of and no or limited experience of investing in funds, who plan to hold their investment for a recommended holding period of at least 3 years, who seek capital growth over the recommended holding period and income; and who understand the risk of losing some or all the capital invested.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 3 years.
The actual risk can vary significantly if you cash in at the early stage and you may get back less.
You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

Additional risks: liquidity.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product or a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 3 years Example investment : EUR 10,000		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	4,580 EUR	6,550 EUR
	Average return each year	-54.2%	-13.2%
Unfavourable	What you might get back after costs	8,610 EUR	8,630 EUR
	Average return each year	-13.9%	-4.8%
Moderate	What you might get back after costs	10,190 EUR	10,680 EUR
	Average return each year	1.9%	2.2%
Favourable	What you might get back after costs	12,090 EUR	12,170 EUR
	Average return each year	20.9%	6.8%

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between 02/2020 and 02/2023.

The moderate scenario occurred for an investment between 05/2015 and 05/2018.

The favourable scenario occurred for an investment between 08/2018 and 08/2021.

This product does not participate in an investor compensation scheme.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	54 EUR	171 EUR
Annual cost impact (*)	0.5%	0.6% each year

(*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.8% before costs and 2.2% after costs.
