## What is this product?

### Type

Shares of a sub-fund of Fidelity UCITS II ICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS).

**SFDR product category:** Article 8 (promotes environmental and/or social characteristics) - ESG Target.

### Term

This fund is open-ended. The Management Company is not entitled to terminate the fund unilaterally, however, the board of directors of Fidelity UCITS II ICAV may terminate the fund by way of liquidation or merger.

### Objectives

**Objective:** The fund aims to provide investors with a total return, taking into account both capital and income returns, which reflects, before fees and expenses, the return of the Solactive Paris Aware Global Government USD Index (the "Index").

**Investment Policy:** The investment policy of the fund is to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the fund's performance and that of the Index.

The fund will aim to replicate the Index by holding all of the Index securities in a similar proportion to their weighting in the Index. The fund may use derivatives for efficient portfolio management and currency hedging purposes.

**Investment Process:** The fund uses a benchmark "index tracking" (also known as "passive") investment management approach by tracking the Index.

The Index is designed to reflect the performance of global local currency government bonds, issued by investment grade countries, while at the same time aiming to exhibit a level of carbon emission intensity 14% lower than the investible universe at launch and subsequently to aim for a further year-on-year decarbonisation target, currently at an average rate of 7% per annum. The Index is weighted by reference to the carbon emission targets described above, as well as other factors such as bond issuance levels, yield levels and foreign exchange rates.

For more information on the Index, please refer to the publically

available information on the index provider's website at <https://www.solactive.com/indices>.

In addition, pursuant to Fidelity's Sustainable Investing Framework, the Investment Manager carries out norms-based screening of issuers that fail to comply or behave in line with the principles of public governance, human rights and foreign affairs, including those identified by internationally recognised country indicators.

**Benchmark:** Solactive Paris Aware Global Government USD Index, an index that takes into account ESG characteristics. Used for: index tracking.

**Base Currency:** USD

**Additional Information:** You may sell (redeem) or switch some or all of your shares to another fund on any Valuation Day.

As this is a non-distributing share class, dividends are re-invested. This key information document describes a sub-fund of Fidelity UCITS II ICAV. A separate pool of assets is invested and maintained for each sub-fund of Fidelity UCITS II ICAV. The assets and liabilities of the fund are segregated from those of other sub-funds and there is no cross-liability among the sub-funds.

### Intended retail investor

This product may appeal to investors with a basic knowledge of and no or limited experience of investing in funds, who plan to hold their investment for a recommended holding period of at least 3 years, who seek capital growth over the recommended holding period and income; and who understand the risk of losing some or all the capital invested.

## What are the risks and what could I get in return?

### Risk Indicator

The risk indicator assumes you keep the product for 3 years.  
The actual risk can vary significantly if you cash in at the early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

**Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

Additional risks: liquidity.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If FIL Investment Management (Luxembourg) S.A., Ireland Branch is not able to pay you what is owed, you could lose your entire investment.

### Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product or a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 3 years Example investment : GBP 10,000		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	6,790 GBP	7,400 GBP
	Average return each year	-32.1%	-9.6%
Unfavourable	What you might get back after costs	7,780 GBP	7,920 GBP
	Average return each year	-22.2%	-7.5%
Moderate	What you might get back after costs	10,210 GBP	10,440 GBP
	Average return each year	2.1%	1.4%
Favourable	What you might get back after costs	11,240 GBP	11,520 GBP
	Average return each year	12.4%	4.8%

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between 10/2020 and 10/2023.

The moderate scenario occurred for an investment between 02/2016 and 02/2019.

The favourable scenario occurred for an investment between 12/2017 and 12/2020.

This product does not participate in an investor compensation scheme.

## What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- GBP 10,000 is invested.

	If you exit after 1 year	If you exit after 3 years
<b>Total costs</b>	22 GBP	69 GBP
<b>Annual cost impact (*)</b>	0.2%	0.2% each year

(\*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.7% before costs and 1.4% after costs.
