## What is this product?

- Type:** This investment fund is a sub-Fund of Legal & General UCITS ETF Plc (the "**Company**"), an umbrella investment company with variable capital and segregated liability between Funds. The Fund is authorised in Ireland and regulated by the Central Bank of Ireland.
- Term:** There is no fixed maturity date.
- Objectives:** **INVALID TEXT DUE TO INCORRECT HTML**
- Intended retail investor:** The Fund is designed for investors looking to grow their money in an investment which can form part of their existing savings portfolio. Although investors can take their money out at any time, the Fund may not be appropriate for those who plan to withdraw their money within five years. The Fund is not designed for investors who cannot afford more than a minimal loss of their investment.

## What is the risk and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This classification rates the potential losses from future performance at a medium-high level, and poor market conditions could impact the value of your investment. Any other risks materially relevant to the PRIIP not included in the summary risk indicator are described in the Fund supplement and/or Prospectus. The lowest category does not mean risk free.

The Fund is subject to the risks associated with technology-focused companies that are particularly vulnerable to rapid developments in technology (which may leave their products out-of-date), government regulation and competition could negatively affect their value.

The value of the Fund may be affected by risks not in the SRI, including failure of a counterparty, custodian, issuer or index provider and derivative use.

This product does not include any protection from future market performance so you could lose some or all of your investment.

**Be aware of currency risk.** You may receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The Fund is not covered by an investor compensation scheme.

## Performance scenarios

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product with input from benchmark(s)/proxy over the last 10 years. Markets could develop very differently in the future.

**Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.**

Investment USD 10,000.00			
Scenarios		1 year	5 years (Recommended holding period)
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress scenario*	What you might get back after costs	3,170 USD	1,590 USD
	Average return each year	-68.3%	-30.7%
Unfavourable scenario**	What you might get back after costs	5,410 USD	7,540 USD
	Average return each year	-45.9%	-5.5%
Moderate scenario***	What you might get back after costs	11,890 USD	17,310 USD
	Average return each year	18.9%	11.6%
Favourable scenario****	What you might get back after costs	19,330 USD	46,860 USD
	Average return each year	93.3%	36.2%

\* The Stress scenario shows what you might get back in extreme market circumstances.

\*\* The Unfavourable scenario was simulated based on the appropriate benchmark used for an investment between 04-2021 and 12-2024.

\*\*\* The Moderate scenario was simulated based on the appropriate benchmark used for an investment between 07-2017 and 07-2022.

\*\*\*\* The Favourable scenario was simulated based on the appropriate benchmark used for an investment between 02-2016 and 02-2021.

This table shows the money you could get back over the next 5 year(s), under different scenarios, assuming that you invest 10,000.00 USD.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

## What happens if LGIM Managers (Europe) Limited is unable to pay out?

If LGIM Managers (Europe) Limited defaults, investors in the Fund would not face any financial losses. However, the value of an investment and any income taken from it is not guaranteed and can go down as well as up, you may not get back the amount you originally invested. The fund is not covered by an investor compensation scheme.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for the holding period(s). They include potential early exit penalties. The figures assume you invest 10,000.00 USD. The figures are estimates and may change in the future.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10,000.00 is invested.

Investment USD 10,000.00	If you cash in after 1 year	If you cash in after 5 years
Total costs	55 USD	480 USD
Impact on return (RIY) per year (*)	0.5%	0.6%

(\*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 12.2% before costs and 11.6% after costs.

## Composition of costs

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.
- What the different cost categories mean.

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	0.00% There is no entry fee for this product.	0 USD
Exit costs	0.00% There is no exit fee for this product.	0 USD
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.49% of the value of your investment per year.	49 USD
Transaction costs	0.06% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	6 USD
Incidental costs taken under specific conditions		
Performance fees and carried interest	0.00% There is no performance fee for this product.	0 USD

## How long should I hold it and can I take my money out early?

An investor can hold their investment for any time period but 5 year(s) is recommended.

The recommended holding period of 5 years has been selected for illustrative purposes for a product with a medium to long-term investment horizon. There is no minimum (or maximum) holding period for the fund and you can redeem your investment any time in accordance with the fund prospectus, however you may receive less than expected if you cash in earlier than the RHP. If you are in any doubt about the suitability of the product to meet your needs, you should seek professional advice. The Shares can be sold by ordinary investors using an intermediary (e.g. a stockbroker) when the markets on which they trade are open. An intermediary is likely to apply a commission to purchases and sales. Please see "What are the costs?" section for details of any exit fees.

The above mentioned period has been defined in accordance to the product characteristics.
