What is this product?

Type:

The Fund is an Exchange-Traded Fund ("ETF") and is a sub-fund of the Company, a company incorporated in Ireland with limited liability as an umbrella type open-ended UCITS investment company with variable capital and segregated liability between its sub-funds under the laws of Ireland with registered number 567964 and authorised by the Central Bank of Ireland.

Term:

The Fund has no maturity date. The Fund may be terminated unilaterally by the directors of the Company and there are circumstances in which the Fund can be terminated automatically, as further described in the prospectus.

Objectives:

Investment objective:

The investment objective of the Fund is to achieve the net total return performance of the MSCI Europe Universal Select Business Screens Index (the "**Index**"), less fees, expenses and transaction costs.

The Index:

The Index tracks the performance of large and mid-capitalisation companies in Europe and aims to represent the performance of an investment strategy that, by adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance ("**ESG**") metrics, seeks to increase overall exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile. The Index is constructed from the MSCI Europe Index (the "**Parent Index**") by using the index provider's ESG exclusionary criteria to exclude from the Parent Index securities that: 1) have not been assessed or rated by the Index Provider on the basis of their ESG credentials; 2) have faced very severe controversies pertaining to ESG issues (including UN Global Compact violations) over the last three years; 3) are involved (as defined by the index provider) in any of the following business activities: controversial weapons, conventional weapons, nuclear weapons, oil sands, thermal coal, civilian firearms, recreational cannabis and tobacco; or 4) have an MSCI ESG rating of CCC. Each of the eligible component securities is then assigned a combined ESG score, which reflects the index provider's assessment of both the security's current ESG rating, as well as the trend in that rating, defined as the change in the security's ESG rating over time. This combined ESG score is then applied to re-weight the eligible securities from their free-float market cap weights in the Parent Index to construct the weighting of the Index. The Index is rebalanced on a semi-annual basis. Issuer weights are capped at 5%.

Investors should note that the Index is the intellectual property of the index provider. The Fund is not sponsored or endorsed by the index provider and a full disclaimer can be found in the Fund's prospectus.

Investment approach:

The Fund is a passively managed Exchange-Traded Fund.

To achieve the investment objective the Fund will, as far as possible and practicable, hold all the shares in the Index in their respective weightings.

The Fund is an Article 8 Fund (it promotes environmental and/or social characteristics) for the purposes of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ("**SFDR**").

The Fund's base currency is EUR.

The Fund may engage in securities lending, whereby 90% of the revenues arising from securities lending will be returned to the Fund and 10% of the revenues will be retained by the securities lending agent.

The Fund may be exposed to the risk of the borrower defaulting on its obligation to return the securities at the end of the loan period and of being unable to sell the collateral provided to it if the borrower defaults.

The Fund may use derivative instruments for the purposes of managing risk, reducing costs or generating additional capital or income.

Dividend Policy:

This Share Class does not pay you income, but instead reinvests it to grow your capital, in line with its stated objectives.

Redemption and Dealing of Shares:

The Fund's shares are listed on one or more Stock Exchange(s). Investors can buy or sell shares daily through an intermediary directly or on Stock Exchange(s) on which the shares are traded. What are the risks and what could I get in return?

Risk Indicator

 The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the ability for you to receive a positive return on your investment.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency from your local currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown here.

This product does not include any protection from future market performance so you could lose some or all of your investment.

For other risks materially relevant to this product which are not taken into account in the summary risk indicator, please refer to the prospectus and/or the Fund's supplement.
