WHAT IS THIS PRODUCT?

Type: This product is a sub-fund of First Trust Global Funds plc (the "Company"), an open-ended investment fund established as a public limited company with segregated liability between sub-funds. The product is an exchange-traded fund.

Term: This product is not subject to any fixed term. The Company is open-ended, however, the shares of the Fund or a class may be redeemed by the Company with notice to shareholders in the circumstances described in the Prospectus.

Objectives:

- The objective of the fund is to seek to provide investors with long term returns, through capital growth.
- The fund intends to pursue an actively managed investment strategy. In order to achieve its investment objective, the Fund will invest primarily in a diversified portfolio of global equity securities issued by companies which the Investment Manager considers to have leading or superior metrics based on environmental, social and governance ("ESG") related criteria (relative to their industry peers) and which, in addition, the Investment Manager considers to exhibit "capital strength" in that they are well capitalised and have strong balance sheets.
- The Investment Manager will consider an issuer to have leading or superior ESG metrics if it is included in the MSCI ACWI ESG Leaders Index (the "MSCI ESG Index"). The MSCI ESG Index is a capitalisation-weighted index that provides exposure to companies with high ESG performance relative to their peers. The MSCI ESG Index is designed for investors seeking a broad, diversified sustainability benchmark with relatively low tracking error to the underlying equity market, represented by the MSCI ACWI Index.
- The Investment Manager applies its proprietary "capital strength" investment methodology to screen issuers of stocks in the MSCI ESG Index for inclusion in the Fund's portfolio. The capital strength methodology evaluates issuers on the following criteria: minimum three-month average trading volume of USD 5 million, minimum of USD 1 billion in cash and short-term investments, long-term debt to market capitalisation ratio of less than 30%, and return on equity of greater than 15%. Issuers in the MSCI ESG Index that do not meet those criteria are discarded, and the resulting portfolio is then adjusted to 50 stocks from the MSCI ESG Index by taking the issuers with the lowest combined three and 12 month volatility and applying the following concentration limits: country weighting in the Fund's portfolio must be within 15 percentage points of the country weight in the MSCI ESG Index, and sector concentration is limited to 30%. In the event that the application of the capital strength methodology results in fewer than 50 stocks, then the securities that had the highest return on equity that initially failed that criterion but passed the debt to market capitalisation ratio and cash and short-term investments constraints are added back to the eligible universe until there are 60 eligible securities. The top 50 securities are then selected based on the volatility criteria subject to the sector and country concentration limits. The 50 stocks are then equally weighted. The Investment Manager screens the stocks in the MSCI ESG Index on a semi-annual basis using its "capital strength" methodology.
- The Fund's portfolio is subject to the Investment Manager's ongoing internal research and analysis, and may be adjusted in the Investment Manager's discretion at or between the weekly and semi-annual evaluations in line with the Fund's investment objective; in such cases the portfolio may consist of slightly more or fewer than 50 stocks.
- The Investment Manager may use its discretion to invest the Fund in assets with weightings different to that of the MSCI ESG Index and also not to invest in all of the constituents of the index by virtue of the capital strength screening it applies.

Income is reinvested into the Fund for this share class.

You may sell your shares usually by sending your request to the administrator on any day on which the London Stock Exchange is open for business.

WHAT ARE THE COSTS?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and should show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10 000 is invested

Investment: 10 000 USD	If you exit after 1 Year	If you exit after 5 Years (recommended holding period)
Total Costs	USD 80	USD 659
Annual Cost Impact (*)	0.8% each year	0.9% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.0% before costs and 10.1% after costs.
