## BNP Paribas Easy S&P 500 ESG UCITS ETF, a subfund of the SICAV BNP PARIBAS Easy ICAV

Class "UCITS ETF Capitalisation" - ISIN code IE0000VX9GN7

This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Europe, part of the BNP Paribas Group.

### Objectives and investment policy

**Investment Objective:** The Sub-Fund (the "Fund") seeks to replicate the performance of the S&P 500 ESG Index NTR (Bloomberg: SPXESUN Index) (the "Index") while aiming to minimise the tracking error between the Fund's Net Asset Value and the Index.

**Investment Policy:** The Fund pursues a passively managed (index tracking) strategy. In order to achieve its investment objective, the Fund will generally seek to replicate the Index by holding all of the Index equity securities in a similar proportion to their weighting in the Index (Full Replication as defined in the Prospectus). The Fund may also employ Optimised Replication (as defined in the Prospectus) and select Index equity securities in order to build a representative portfolio that provides a return that is comparable to that of the Index.

The Index is a broad-based, net return (calculated with dividends reinvested after the deduction of applicable withholding taxes), float-adjusted market capitalisation weighted index that is designed to measure the performance of securities meeting extra-financial (Environmental, Social and Governance (ESG)) criteria, while maintaining a similar overall industry group weights as the S&P 500 Index. The Index constituents must be part of the S&P 500 index (the "Eligible Universe"). The S&P 500 index is an equity index representative of the 500 leading securities by market capitalization traded in the USA. The Index is rebalanced annually.

The Index applies exclusions from the Eligible Universe based on companies' involvement in specific business activities such as, but not limited to, controversial weapons, thermal coal or tobacco, the principles of United Nations' Global Compact or involvement in relevant ESG controversies.

In addition, the Index excludes securities from the Eligible Universe ("selectivity" approach) via a best-in-class methodology (a type of ESG selection consisting of giving priority to the best rated companies from an extra-financial angle within their sector of activity, without favouring nor excluding a given sector compared to a reference universe or index).

The extra-financial strategy of the Index, carried out at each step of the investment process, may comprise methodological limitations such as the Extra-financial Criteria and Sustainable Investments Risk or the Index rebalancing. The Fund's base currency is US Dollar. **Distribution Policy:** It is not the current intention of the Directors to declare dividends in respect of Classes identified as "Capitalisation". **Recommendation:** This Fund is suitable for medium to long term investment, though the Sub-Fund may also be suitable for shorter term exposure to the Index. Please refer to the supplement of the Fund (the "Supplement") for additional details about the objective and investment policy.

### Risk and reward profile

For more information on risks, please see the risks section of the Fund's prospectus, which is available at <http://www.bnpparibas-am.com>.

- Historical data may not be reliable indication for the future.
  - The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
  - The lowest category does not mean a risk-free investment.
  - Why is the Fund in this specific category?
  - The higher the risk, the longer the recommended investment horizon.
- The risk category is justified by the investment mainly in stocks and shares, the value of which can fluctuate considerably. These fluctuations are often amplified in the short term.
