

Franklin MSCI World Catholic Principles UCITS ETF

Class SINGLECLASS • ISIN IE000AZOUN82 • A sub-fund of Franklin Templeton ICAV
The management company is Franklin Templeton International Services S.à r.l.

Objectives and Investment Policy

Franklin MSCI World Catholic Principles UCITS ETF (the “Fund”) investment objective is to provide exposure to large and mid-capitalisation companies that are considered to be environmentally and socially responsible in developed market countries globally.

Investment Policy

The Fund invests in large and mid-capitalisation companies in developed markets, globally. These investments are included in the benchmark.

The Index is based on the MSCI World Index (the “Parent Index”) which is comprised of large and mid-capitalisation companies across developed market countries.

The Index aims to represent the performance of companies that have lower carbon exposure and higher Environmental, Social and Governance (“ESG”) performance relative to the Parent Index. The Index also excludes companies that are involved in controversial businesses or that are considered to have negative environmental or social impacts.

Additionally, the Index excludes securities from the Parent Index that do not meet certain Roman Catholic principles or are contrary to Roman Catholic values including companies with ties to abortion or contraceptives, animal testing or stem cell research.

Derivatives and techniques The Fund may use derivatives for hedging and efficient portfolio management.

Strategy The investment manager seeks to minimise the difference between the fund’s performance and that of the benchmark (tracking error), regardless of whether the benchmark level rises or falls.

SFDR category Article 8 (promotes environmental and/or social characteristics under EU regulations).

For more information see www.franklintempleton.lu/40161

Base currency US dollar (USD).

Benchmark(s) MSCI World Select Catholic Principles ESG Universal and Low Carbon Index-NR. Used for index tracking only.

The Fund is passively managed and seeks to replicate the benchmark by holding all of the Index securities in a similar proportion to their weighting in

the benchmark. Its portfolio, and thus its performance, closely resemble that of the benchmark.

Buying and selling shares

You may buy or sell shares daily through a broker on the stock exchange where the shares are traded. Authorised participants, such as selected financial institutions, may buy or sell shares directly with the fund, on any day the London Stock Exchange is open for business (provided that on such day the markets on which substantially all of the Fund’s investments are traded are open).

Intended retail investor

Investors who understand the risks of the Fund and plan to invest for at least 3 to 5 years. The Fund may appeal to investors who:

- are looking for long-term capital growth
- are interested in exposure to large and mid capitalization companies in developed equity markets as part of a diversified portfolio, by way of an exchanged traded Fund
- have a high risk profile and can tolerate moderate short-term changes in the share price

Product availability The Fund is available to all investors with at least basic investment knowledge, through a wide range of distribution channels, with or without the need for advice.

Terms to Understand

derivatives: Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

efficient portfolio management: A strategy aimed at reducing risk, lowering costs or generating additional capital or income for the Fund through the use of derivatives. These strategies must align with the Funds risk profile.

Share Class Currency: USD

Treatment of Income: For accumulation shares, income from investments is reinvested in the Fund and reflected in the price of shares.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

As the share class has no sufficient historical data available, simulated data based on a representative portfolio model or benchmark have been used instead.

Why is the Fund in this specific category?

The Fund seeks to track the performance of the MSCI World Select Catholic Principles ESG Universal and Low Carbon Index -NR (the “Index”).

The Index is based on the MSCI World Index (the “Parent Index”) which is comprised of large and mid-cap stocks across a range of developed market countries. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods.

Risks materially relevant not adequately captured by the indicator:

Counterparty risk: the risk of failure of financial institutions or agents (when serving as a counterparty to financial contracts) to perform their obligations, whether due to insolvency, bankruptcy or other causes.

Derivative Instruments risk: the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks.

Foreign Currency risk: the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

Index related risk: the risk that quantitative techniques used in creating the Index the Fund seeks to track do not generate the intended result, or that the portfolio of the Fund deviates from its Index composition or performance.

Secondary market trading risk: the risk that the shares purchased on the secondary market cannot usually be sold directly back to the Fund and that investors may therefore pay more than the NAV per share when buying shares or may receive less than the current NAV per Share when selling shares.

For a full discussion of all the risks applicable to this Fund, please refer to the “Risk Considerations” section of the current prospectus of Franklin Templeton ICAV.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	Not applicable
Exit charge	Not applicable

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the Fund over a year

Ongoing charges	0.27%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	Not applicable
-----------------	----------------

The entry and exit charges shown are maximum amounts: you may pay less in some cases. For more information please ask your financial adviser.

The ongoing charges shown here are an estimate of the charges. We have used estimated figures as under current applicable rules we are not allowed to calculate ongoing charges for share classes with less than 12 months of data. The UCITS' annual report for each financial year will include detail on the exact charges made.

For detailed information about charges, please refer to the "Fees and Expenses" section of the current prospectus of Franklin Templeton ICAV and the Fund supplement.
