Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

L&G Energy Transition Commodities UCITS ETF

Share Class USD Accumulating ETF - ISIN: IE000BLN64M9. The Fund is a sub-fund of Legal & General UCITS ETF Plc (the "**Company**").
Managed by LGIM Managers (Europe) Limited, a member of the Legal & General group (the "**Manager**")

OBJECTIVES AND INVESTMENT POLICY

- The L&G Energy Transition Commodities UCITS ETF (the â€œ **Fund**â€) is a passively managed exchange traded fund ("**ETF**") that aims to track the performance of the Solactive Energy Transition Commodity Total Return Index (the "**Index**"), subject to the deduction of the ongoing charges and other costs associated with operating the Fund.

- **Dealing.** Shares in this share class (the “ **Shares**”) are denominated in USD and can be bought and sold on stock exchanges by ordinary investors using an intermediary (e.g. a stockbroker). In normal circumstances, only Authorised Participants may buy and sell Shares directly with the Company. Authorised Participants may redeem their Shares on demand in accordance with the “Dealing Timetable” published on **www.lgim.com**.

- **Index**.The Index provides a return equivalent to a fully â€œcollateralisedâ€ investment in a diversified portfolio of commodity futures and transferable securities with a view to providing exposure to the global energy transition across the following segments: (1) transition metals (2) transition energy and (3) carbon. Subject to the liquidity considerations included within the Index Methodology, the transition metals segment is comprised of futures on aluminium, copper, lead, nickel, tin, zinc, gold, silver, platinum, iron ore, cobalt and lithium. These metals are used in the production of lithium-ion batteries, solar panels, wind turbines. Subject to the liquidity considerations included within the Index Methodology, the transition energy segment is comprised of futures on natural gas (European and US natural gas futures contracts), ethanol and uranium. Natural gas emits less carbon than most other fossil fuels. Ethanol is an alternative liquid fuel to petroleum based fuels. Uranium is used in nuclear energy which does not produce greenhouse gas emissions. The carbon allocation in the Index is achieved via an allocation to an exchange listed debt certificate which provides exposure to an index of global carbon futures, including European Union Allowances (EUA), California Carbon Allowances (CCA) and Regional Greenhouse Gas Initiative (RGGI). A "futures contract" is an agreement to buy or sell a certain amount of an asset (such as a commodity) at a certain date in the future at a price that is agreed upon today.

- **Replication**.In order to provide the Share Class with exposure to the Index, the Company will primarily enter into "total return swap" agreements with one or more "swap counterparties"(i.e. investment banks) pursuant to which the Share Class receives the financial performance of the Index from the swap counterparties in return for a fee. Under the swap agreements, the Share Class receives payments from the swap counterparties when the Index increases and makes payments to the swap counterparties when the Index decreases. Swaps enable the Share Class to efficiently track the upward or downward in order to provide the Share Class with exposure to the Index without having to purchase the commodity futures contracts and transferable securities comprised in the Index. The swap arrangements are "unfunded" which means that the Fund retains all investor subscription money (rather than transferring it to the swap counterparty) and invests it in a diversified portfolio of low risk assets.

- **Dividend Policy.** This share class does not intend to pay dividends. Any income which may result from the Fund’s investments will be re-invested into the Fund.

RISK AND REWARD PROFILE

Lower Risk — Higher Risk

Potentially lower rewards — Potentially higher rewards

1	2	3	4	5	6	7

- The Fund is rated 6 due to the nature of its investments and its risks. The rating is calculated based on historical data and may not be a reliable indication of the Fund’s future risk profile. The risk category may shift over time. The lowest category on the above scale does not mean “risk free”.

- Market trading in commodity futures contracts can be extremely “volatile”. The prices of the futures contracts comprised in the Index may fluctuate rapidly based on numerous factors, including supply and demand relationships, trade, economic or political events, technological developments, interest rates and governmental policies.

The risk and reward indicator may not take account of the following risks of investing in the Fund :

- The Fund may have underlying investments that are valued in currencies that are different from USD, in which case exchange rate fluctuations will impact the value of your investment. In addition, the return in the currency of this share class may be different to the return in your own currency.

- If a swap counterparty is no longer willing or able to continue entering into swaps with the Fund, the Fund may not be able to continue tracking the Index.

- If a swap counterparty increases the cost of entering into swaps with the Fund, the Fund’s performance will be negatively impacted.

- Third party service providers (such as counterparties entering into FDIs with the Fund or the Company’s depositary) may go bankrupt and fail to pay money due to the Fund or return property belonging to the Fund.

- If the Index provider stops calculating the Index or if the Fund’s license to track the Index is terminated, the Fund may have to be closed.

- It may not always be possible to buy and sell Shares on a stock exchange or at prices closely reflecting the NAV.

- There is no capital guarantee or protection on the value of the Fund. Investors can lose all the capital invested in the Fund.

Please refer to the “Risk Factors” section of the Company’s Prospectus and the Fund Supplement.

LGIM

CHARGES FOR THE FUND

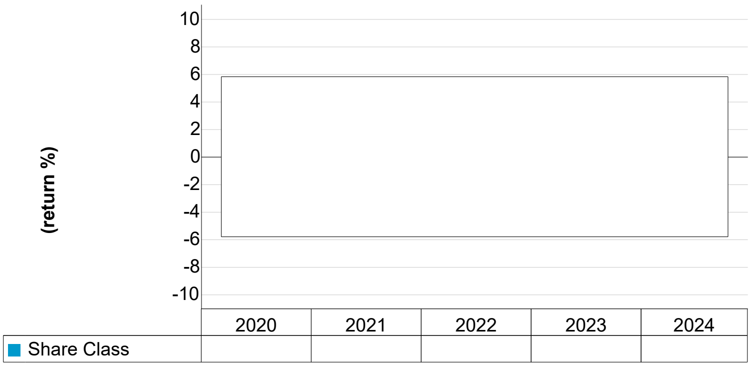
The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%*
Exit charge	0.00%*
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the Share Class over a year	
Ongoing charge	0.65%
Charges taken from the Share Class over a year	
Performance fee	None

*Authorised Participants dealing directly with the Company will pay related transaction costs

- Ordinary investors (i.e. who buy and sell Shares on stock exchanges) are not charged entry or exit charges by the Company but may be charged dealing costs and fees by their stockbroker. Please consult your stockbroker and/or investment adviser for details of such fees.
- The ongoing charges figure is based on expenses for the 12 month period ended 31 December 2024 and may vary from year to year . The ongoing charges figure excludes portfolio transaction costs (except for the custody transaction costs paid to the Depositary which are included).
- For more information about charges, please see the “Fees and Expenses” section of the Company’s Prospectus and the “Dealing Procedures” and “Dealing Information” sections of the Fund Supplement which are available at: **www.lgim.com**.

PAST PERFORMANCE



- The Fund has been in existence since 08 March 2024.
- This Share Class has been in existence since 17 April 2024.
- There is insufficient data to provide a useful indicator of past performance to investors.

PRACTICAL INFORMATION

- The Fund's depositary is The Bank of New York Mellon SA/NV, Dublin Branch..
- The Fund is one of a number of sub-funds of the Company. The assets and liabilities of each sub-fund are segregated from each other by Irish law. Although the rights of investors and creditors are normally limited to the assets of each sub-fund, the Company is a single legal entity that may operate in jurisdictions which may not recognise such segregation.
- The Company is resident in Ireland for taxation purposes. This may have an impact on your personal tax position. Please consult your investment or tax adviser for advice on your own tax liabilities.
- The Manager may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Company’s Prospectus.
- Further information about the Fund and the share class can be obtained from the Company’s Prospectus and Fund Supplement and the annual and interim financial statements (that are prepared for the Company as a whole), which are available, in addition to the latest available NAV for the share class and details of the Fund’s portfolio, at: **www.lgim.com**. These documents are available free of charge in English and certain other languages.
- Switching of shares between this share class and other share classes of the Fund and/or other sub-funds of the Company is not permitted.
- An indicative intra-day net asset value (“iNAV”) for the Share Class will be available at: **https://www.solactive.com/**
- Details of the Manager’s uptodate policy in respect of remuneration, including a description of how remuneration and benefits are calculated and the identities of the persons responsible for awarding same can be accessed from the following website: **www.lgim.com**. A paper copy is also available free of charge from the Manager upon request.
