

## Franklin FTSE Developed World UCITS ETF

**Class SINGLECLASS • ISIN IE000CVOSY02 •** A sub-fund of Franklin Templeton ICAV  
The management company is Franklin Templeton International Services S.à r.l.

### Objectives and Investment Policy

Franklin FTSE Developed World UCITS ETF (the “Fund”) aims to provide exposure to large and mid-capitalisation stocks in developed market countries globally.

The Fund seeks to track the performance of the FTSE Developed Index NR (the “Index”) as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Fund’s performance and that of the Index.

The Index is a broad free float market-capitalisation weighted index which captures large and mid-sized companies from developed markets globally. The Index is derived from the FTSE Global Equity Index Series, an index which covers 98% of the world’s investable market capitalisation. The Index is rebalanced quarterly in March, June, September and December.

The securities in which the Fund invests will be primarily listed or traded on recognised markets globally in accordance with the limits set out in the UCITS Regulations.

The Fund may use derivatives for efficient portfolio management purposes only.

The investment manager will aim to replicate the Index by holding all of the Index securities in a similar proportion to their weighting in the Index. However, where full replication of the Index is not reasonably possible, the Fund will use the optimisation methodology to select Index securities in order to build a representative portfolio that provides a return that is comparable to that of the Index but which may not track the Index with the same degree of accuracy as an investment vehicle replicating the entire Index may.

The Fund may appeal to investors looking to track the performance of large and mid-capitalisation stocks in developed market countries globally and who are willing to hold their investment over the medium to long term, for a minimum period of 3 to 5 years. The Fund may be suitable for investors

who do not have specific knowledge and/or experience of financial markets and who understand that they may not get back the full amount invested in the Fund.

The Fund’s shares are listed and traded on one or more stock exchanges. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares directly with the Fund. Other investors can deal in shares daily through a broker on stock exchange(s) on which the shares are traded.

For further information on the Objectives and Investment Policy of the Fund, please refer to the “Investment Objective and Strategy” section of the current prospectus of Franklin Templeton ICAV and the Fund supplement.

#### Terms to Understand

**Mid-capitalisation stock:** stock of companies with market capitalisation generally accounting accumulatively for the next 20% of the capitalisation of a domestic stock market below large-capitalisation stock.

**Derivatives:** Financial instruments whose characteristics and value depend on the performance of one or more underlying assets, typically securities, indexes, currencies or interest rates.

**Developed markets:** countries whose economy, stock market, political situation and regulatory framework are developed.

**Large-capitalisation stock:** stock of companies with large market capitalisation generally accounting accumulatively for the top 70% of the capitalisation of a domestic stock market.

For accumulation shares, income from investments is reinvested in the Fund and reflected in the price of shares.

### Risk and Reward Profile

#### What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

As the share class has no sufficient historical data available, simulated data based on a representative portfolio model or benchmark have been used instead.

#### Why is the Fund in this specific category?

The Fund intends to track the performance of the Underlying Index which is comprised of large and mid-sized companies from developed markets globally. Such assets have historically been subject to price movements

due to such factors as general stock market volatility, changes in the financial outlook or fluctuations in currency markets. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods.

#### Risks materially relevant not adequately captured by the indicator:

**Index Tracking Risk:** No financial instrument or set of investment techniques enables the returns of any Index to be reproduced or tracked exactly. Changes in the investments of any Sub-Fund and re-weightings of the relevant Index may give rise to various transaction costs, operating expenses or inefficiencies which may adversely impact a Sub-Fund’s tracking of an Index.

**Index License Risk:** To utilise an Index, the Fund may need to have a licence agreement signed with the Index Provider. If, at any time in respect of an Index, the licence granted terminates or disputed, impaired or ceases to exist, the Directors may be forced to replace the Index with another Index. Such a substitution or any delay in such a substitution may have an adverse impact on the Sub-Fund.

**Passive Investment Risk:** An Index Tracking Sub-Fund will be negatively affected by general declines in the securities and asset classes represented in its Index. Because Index Tracking Sub-Funds are not “actively” managed, Market disruptions and regulatory restrictions could have an adverse effect on an Index Tracking Sub-Fund’s ability to adjust its exposure to the required levels.

For a full discussion of all the risks applicable to this Fund, please refer to the “Risk Considerations” section of the current prospectus of Franklin Templeton ICAV.

### Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

#### One-off charges taken before or after you invest

|                     |      |
|---------------------|------|
| <b>Entry charge</b> | None |
| <b>Exit charge</b>  | None |

*This is the maximum that might be taken out of your money before it is invested.*

#### Charges taken from the Fund over a year

|                        |       |
|------------------------|-------|
| <b>Ongoing charges</b> | 0.09% |
|------------------------|-------|

#### Charges taken from the Fund under certain specific conditions

|                        |                |
|------------------------|----------------|
| <b>Performance fee</b> | Not applicable |
|------------------------|----------------|

The entry and exit charges shown are maximum amounts: you may pay less in some cases. For more information please ask your financial adviser.

The ongoing charges shown here are an estimate of the charges. We have used estimated figures as under current applicable rules we are not allowed to calculate ongoing charges for share classes with less than 12 months of data. The UCITS’ annual report for each financial year will include detail on the exact charges made.

For detailed information about charges, please refer to the “Fees and Expenses” section of the current prospectus of Franklin Templeton ICAV and the Fund supplement.
