

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

JPMorgan ETFs (Ireland) ICAV

ISIN: IE000G3A6RN7

JPM Carbon Transition China Equity (CTB) UCITS ETF - USD (acc)

a Share Class of JPMorgan ETFs (Ireland) ICAV – Carbon Transition China Equity (CTB) UCITS ETF. The management company is JPMorgan Asset Management (Europe) S.à r.l.

Objectives and Investment Policy

Investment Objective: The Sub-Fund seeks to provide returns that correspond to those of its Index.

Investment Policy: The Sub-Fund pursues a passively managed (index tracking) strategy.

The Sub-Fund aims to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index.

The Index is comprised of large and mid-capitalisation Chinese equity securities listed in Hong Kong, Shanghai, Shenzhen and outside of the People's Republic of China (PRC) (the "Index Securities"). The components of the Index are selected from the components of the Solactive GBS China Large & Mid Cap USD Index (the "Investable Universe") in accordance with the Index's rules-based methodology which is summarised below. The constituents of the Index may be subject to change over time. The Index rebalances on a quarterly basis (as referred to under "Index Tracking Risk" in the Prospectus). Further details on the Index and the Investable Universe, including their methodology, components and performance, are available at <https://www.solactive.com/indices/?index=DE000SLOGMRO>.

The Index aims to meet the requirements for EU Climate Transition Benchmarks as defined in the EU Climate Benchmarks Regulation and provide lower carbon emission exposure relative to the Investable Universe with a view to achieving the long-term global warming objectives of the Paris Agreement. In particular, the Index aims to achieve a reduction of the greenhouse gas intensity of the Index of at least 7% on average per annum and an overall reduction of the greenhouse gas intensity of the Index compared to the Investable Universe of at least 30%. Greenhouse gas intensity means greenhouse gas emissions divided by enterprise value including cash.

The Index is designed to capture the performance of companies which have been identified through its rules-based process as best positioned to benefit from a transition to a low carbon economy by effectively managing their emissions, resources and climate-related risks. The Index applies this rules-based non-financial analysis process to all Index Securities as further described below.

Index construction

The Index methodology applies values and norms based screening to implement exclusions on certain industries and issuers based on specific ESG criteria and/or minimum standards of business practice based on international norms. To support this screening, the Index Provider relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the values and norms based screens.

The Index then uses a three-step, rules based approach. First, the sector weights are allocated in accordance with the Investable Universe. Second, all remaining eligible companies are evaluated through the use of JPMorgan Asset

Management's proprietary research and third party data and allocated an aggregate score derived from the following three scores: (i) emissions score (how effectively the company is managing emissions on site, as well as through its provision of products and services), (ii) resource management score (how effectively the company is managing the resources which it consumes such as electricity, water and waste), and (iii) risk management score (how effectively the company is managing its physical risks and reputational risks). Finally, the companies are re-weighted relative to the weights that they have in the Investable Universe based on their aggregate score, leading to companies with higher scores having a higher weighting in the Index and similarly those with lower scores having a lower weighting in the Index.

Although the Index is generally well diversified, due to the nature of the market which the Index reflects, it may have a higher concentration in certain constituents at any one time. In particular, in order for the Sub-Fund to track the Index accurately, the Sub-Fund will make use of the increased diversification limits available under Regulation 71 of the UCITS Regulations. These limits permit the Sub-Fund to hold positions in individual constituents of the Index issued by the same issuer of up to 20% of the Sub-Fund's Net Asset Value.

The Sub-Fund may invest in securities that rely on VIE structures to gain indirect exposure to underlying Chinese companies in order to track the performance of the Index.

The Sub-Fund has sustainable investment as its objective and invests at least 80% of assets, excluding cash, cash equivalents (such as certificates of deposit and commercial paper), money market funds and financial derivative instruments for efficient portfolio management, in sustainable investments, as defined under the SFDR and based on the Investment Manager's scoring methodology.

The Sub-Fund systematically includes ESG criteria in investment analysis and investment decisions on at least 90% of securities purchased (excluding cash). The Sub-Fund may invest in assets denominated in any currency and currency exposure will not typically be hedged.

The Sub-Fund may, for efficient portfolio management purposes, use financial derivative instruments.

USD is the base currency of the Sub-Fund.

Redemption and Dealing: Shares of the Sub-Fund are traded on one or more stock exchanges. Certain market makers and brokers may subscribe and redeem Shares directly with JPMorgan ETFs (Ireland) ICAV, and are referred to as "Authorised Participants". Other investors who are not Authorised Participants can purchase and sell Shares daily on a recognised stock exchange or over-the-counter.

Index: Solactive J.P.Morgan Asset Management China Carbon Transition Index.

Distribution Policy: This Share Class will not pay dividends.

Risk and Reward Profile

Lower risk **Higher risk**
Potentially lower reward Potentially higher reward

The above rating is based on the historic volatility of the simulated Net Asset Value of this Share Class over the last five years and may not be a reliable indication of the future risk profile of this Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 7 because its simulated Net Asset Value has shown very high fluctuations historically.

OTHER MATERIAL RISKS

- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The value of equities may go down as well as up in response to the performance of individual companies and general market conditions, sometimes rapidly or unpredictably. If a company goes through bankruptcy or a similar financial restructuring, its shares in issue typically lose most or all of their value.
- To the extent that the Sub-Fund uses FDI, the risk profile and the volatility of the Sub-Fund may increase. That notwithstanding, the risk profile of the Sub-Fund is not expected to significantly deviate from that of the Index as a result of its use of FDI. For information in relation to risks associated with the use of FDI, please refer to "Derivative Risks" in the "Risk Information" section of the Prospectus.
- Since the instruments held by the Sub-Fund may be denominated in currencies other than the Base Currency, the Sub-Fund may be affected

unfavourably by exchange control regulations or fluctuations in currency rates. For this reason, changes in currency exchange rates can affect the value of the Sub-Fund's portfolio and may impact the value of the Shares.

- The exclusion of companies that do not meet certain ESG criteria from the Sub-Fund's Investable Universe, through the screening performed as part of the index methodology described above, may cause the Sub-Fund to perform differently compared to similar funds that do not have such a policy.
- The Sub-Fund will invest in Chinese securities through the China-Hong Kong Stock Connect Programmes which are subject to regulatory change, quota limitations and also operational constraints (as set out in the Prospectus) which may result in increased counterparty risk.
- Movements in currency exchange rates can adversely affect the return of your investment. RMB is currently not a freely convertible currency and is subject to exchange controls and restrictions. The Sub-Fund's investments via China-Hong Kong Stock Connect may be adversely affected by movements of exchange rates between RMB and other currencies. There can be no assurance that the RMB exchange rate will not fluctuate widely against US Dollar or any other currency in the future. Any depreciation of the RMB will decrease the value of RMB denominated assets, which may have a detrimental impact on the performance of the Sub-Fund.
- The RMB is traded in both the onshore and offshore markets. While both CNY and CNH represent the same currency, they are traded in different and separate markets which operate independently. Therefore, CNY and CNH do not necessarily have the same exchange rate and their movement may not be in the same direction. When calculating the Net Asset Value per Share of a non-RMB denominated Class, the Administrator will apply the exchange rate for the offshore RMB market in Hong Kong, i.e. the CNH exchange rate, which may be at a premium or discount to the exchange rate for the onshore RMB market in the PRC, i.e. the CNY exchange rate.
- The Sub-Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Sub-Fund is, however, expected to provide

investment results that, before expenses, generally correspond to the price and yield performance of the Index.

- Due to the composition of the Index, the Sub-Fund's portfolio may be more concentrated geographically than other Sub-Funds with more diversified

portfolios and may, consequently, be subject to greater volatility than such Sub-Funds.

- Further information about risks can be found in the "Risk Information" section of the Prospectus.

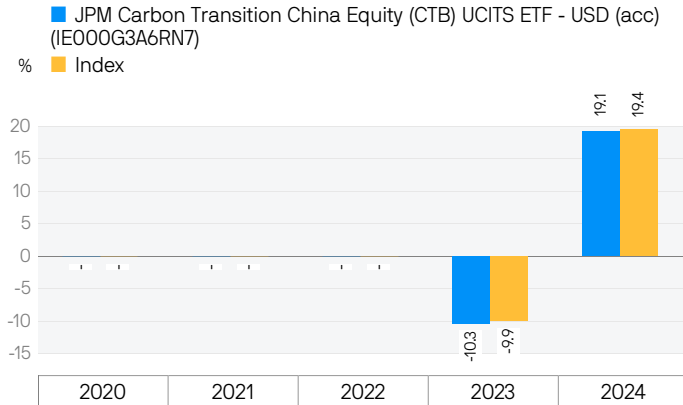

Charges

| One-off charges taken before or after you invest | |
|---|-------|
| Entry charge | None |
| Exit charge | None |
| Charges taken from this Share Class over a year | |
| Ongoing charge | 0.35% |
| Charges taken from this Share Class under certain specific conditions | |
| Performance fee | None |

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

- Investors who are not Authorised Participants may have to pay brokerage commissions or other charges determined and imposed by their brokers when buying or selling Shares on stock exchange(s). Information on charges can be obtained from your broker. Authorised Participants dealing directly with JPMorgan ETFs (Ireland) ICAV will pay related transaction costs.
- Charges are used to pay the costs of running this Share Class, including the costs of marketing and distribution. These charges reduce the potential growth of the investment.
- The ongoing charge figure is estimated and is based on the expected total of charges. The UCITS' annual report for each financial year will include detail on the exact charges made.
- Further information about charges can be found in the "Fees and Expenses" section of the Prospectus.

Past Performance

- Past performance is not a guide to future performance.
- Performance data has been calculated including tax, ongoing charges and portfolio transaction costs and excluding entry and exit charges, in USD.
- Where no past performance is shown there was insufficient data available in that year to provide performance.
- Sub-Fund launch date: 2022.
- Share Class launch date: 2022.

Practical Information

Depository: The depository is Brown Brothers Harriman Trustee Services (Ireland) Limited.
