

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

JPMorgan ETFs (Ireland) ICAV

ISIN: IE000LHP8TA1

JPM Global Aggregate Bond Active UCITS ETF - USD (dist)

a Share Class of JPMorgan ETFs (Ireland) ICAV – Global Aggregate Bond Active UCITS ETF. The management company is JPMorgan Asset Management (Europe) S.à r.l.

Objectives and Investment Policy

Investment Objective: The objective of the Sub-Fund is to achieve a long-term return in excess of Bloomberg Global Aggregate Index Total Return USD Unhedged ("the Benchmark") by actively investing primarily in a portfolio of investment grade debt securities, globally, using financial derivative instruments to gain exposure to underlying assets, where appropriate.

Investment Policy: The Sub-Fund pursues an actively-managed investment strategy.

The Sub-Fund aims to invest at least 67% of its assets (excluding assets held for ancillary liquidity purposes) in investment grade debt securities (including ABS/MBS), either directly or through the use of financial derivative instruments ("FDI"). Issuers of these securities may be located in any country, including emerging markets.

The Sub-Fund systematically includes environmental, social and governance ("ESG") analysis in its investment decisions on at least 75% of non-investment grade and emerging market sovereign securities and 90% of investment grade securities purchased. Pursuant to the Sub-Fund's ESG analysis, at least 51% of the Sub-Fund's Net Asset Value are invested in issuers with positive environmental and/or social characteristics that follow good governance practices, as measured through the Investment Manager's proprietary ESG scoring methodology and/or third party data. The Sub-Fund promotes environmental and/or social characteristics.

The Sub-Fund invests at least 10% of its Net Asset Value in Sustainable Investments, as defined under SFDR, contributing to environmental or social objectives.

The Investment Manager evaluates and applies values and norms based screening to implement exclusions on certain industries and issuers based on specific ESG criteria and/or minimum standards of business practice based on international norms. To support this screening, the Investment Manager relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the values and norms based screens. The list of screens applied that may result in exclusions can be found on the Website (www.jpmorganassetmanagement.ie).

The Sub-Fund will seek to outperform the Benchmark over the long-term. The Benchmark consists of multi-currency treasury, government-related, corporate and securitized fixed-rate bonds from developed and emerging markets issuers ("Benchmark Securities"). The Benchmark has been included as a point of reference against which the performance of the Sub-Fund may be measured. The Sub-Fund will resemble the composition and

risk characteristics of its Benchmark; however, the Investment Manager's discretion may result in performance that differs from the Benchmark.

The Sub-Fund will not seek to track the performance of or replicate the Benchmark, rather the Sub-Fund will hold a portfolio of debt securities (which may include but will not be limited to the Benchmark Securities) which is actively selected and managed with the aim of delivering an investment performance which exceeds that of the Benchmark over the long-term. The Investment Manager aims to do this by selecting securities and obtaining exposures through the use of an integrated research driven investment process that focuses on analysing fundamental, quantitative and technical factors across countries, sectors and issuers.

The Sub-Fund invests across all sectors of global investment grade debt which includes Sovereign Debt, government related, corporate, emerging markets and securitised debt.

The Sub-Fund may, for investment purposes and efficient portfolio management purposes, use financial derivative instruments.

The Sub-Fund seeks to assess the impact of ESG factors on the cash flows of many companies in which it may invest, to identify issuers that it believes will be negatively impacted by such factors relative to other issuers. The Investment Manager focuses on key risk factors, including, accounting and tax policies, disclosure and investor communications, shareholder rights, remuneration and social and environmental factors, seeking to identify such negative outliers.

The above assessments may not be determinative on investment decisions in respect of a company's securities and the Investment Manager may purchase and retain such securities.

USD is the base currency of the Sub-Fund.

Redemption and Dealing: Shares of the Sub-Fund are traded on one or more stock exchanges. Certain market makers and brokers may subscribe and redeem Shares directly with JPMorgan ETFs (Ireland) ICAV, and are referred to as "Authorised Participants". Other investors who are not Authorised Participants can purchase and sell Shares daily on a recognised stock exchange or over-the-counter.

Benchmark: Bloomberg Global Aggregate Index Total Return USD Unhedged..

Distribution Policy: This Share Class will normally pay dividends semi-annually.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.jpmorganassetmanagement.ie.

Risk and Reward Profile

Lower risk Potentially lower reward

Higher risk Potentially higher reward

The above rating is based on the historic volatility of the simulated Net Asset Value of this Share Class over the last five years and may not be a reliable indication of the future risk profile of this Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 4 because its simulated Net Asset Value has shown medium fluctuations historically.

OTHER MATERIAL RISKS

- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. These risks are typically increased for below investment grade debt securities which may also be subject to higher volatility and lower liquidity than investment grade debt securities. The credit worthiness of unrated debt securities is not measured by reference to an independent credit rating agency.
- Emerging markets may be subject to increased political, regulatory and economic instability, less developed custody and settlement practices, poor transparency and greater financial risks. Emerging market currencies may be subject to volatile price movements.
- Emerging market securities may also be subject to higher volatility and lower liquidity than developed market securities respectively.

- Investments in onshore debt securities issued within the PRC through Bond Connect are subject to regulatory change and operational constraints which may result in increased counterparty risk. Market volatility and potential lack of liquidity due to low trading volumes may cause prices of bonds to fluctuate significantly.
- To the extent that the Sub-Fund uses financial derivative instruments, the risk profile and the volatility of the Sub-Fund may increase.
- Convertible securities have characteristics of both debt and equity securities and carry credit, default, equity, interest rate, liquidity and market risks. Convertible bonds may also be subject to lower liquidity than the underlying equity securities.
- Contingent Convertible Securities are likely to be adversely impacted should specific trigger events occur (as specified in the contract terms of the issuing company). This may be as a result of the security converting to equities at a discounted share price, the value of the security being written down, temporarily or permanently, and/or coupon payments ceasing or being deferred.
- Asset-backed and mortgage-backed securities may be highly illiquid, subject to adverse changes to interest rates and to the risk that the payment obligations relating to the underlying asset are not met.
- Since the instruments held by the Sub-Fund may be denominated in currencies other than the Base Currency, the Sub-Fund may be affected unfavourably by exchange control regulations or fluctuations in currency rates. For this reason, changes in currency exchange rates can affect the value of the Sub-Fund's portfolio and may impact the value of the Shares.
- Exclusion of companies that do not meet certain ESG criteria from the Sub-Fund's investment universe may cause the Sub-Fund to perform differently compared to similar funds that do not have such a policy.
- The Sub-Fund seeks to provide a return above the Benchmark; however the Sub-Fund may underperform the Benchmark.
- Further information about risks can be found in the "Risk Information" section of the Prospectus.

Charges

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None

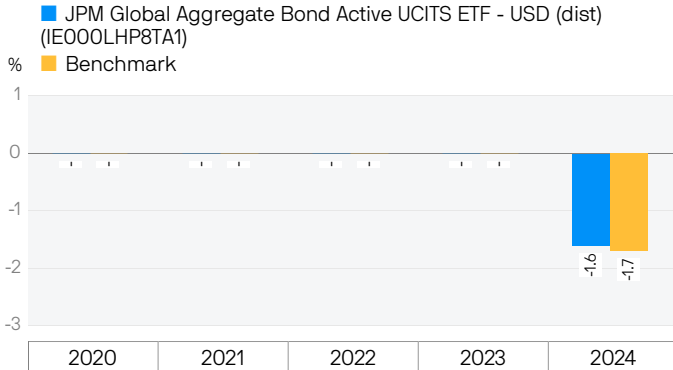

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from this Share Class over a year	
Ongoing charge	0.30%

Charges taken from this Share Class under certain specific conditions	
Performance fee	None

- Investors who are not Authorised Participants may have to pay brokerage commissions or other charges determined and imposed by their brokers when buying or selling Shares on stock exchange(s). Information on charges can be obtained from your broker. Authorised Participants dealing directly with JPMorgan ETFs (Ireland) ICAV will pay related transaction costs.
- Charges are used to pay the costs of running this Share Class, including the costs of marketing and distribution. These charges reduce the potential growth of the investment.
- The ongoing charge figure is estimated and is based on the expected total of charges. The UCITS' annual report for each financial year will include detail on the exact charges made.
- Further information about charges can be found in the "Fees and Expenses" section of the Prospectus.

Past Performance

- Past performance is not a guide to future performance.
- Performance data has been calculated including tax, ongoing charges and portfolio transaction costs and excluding entry and exit charges, in USD.
- Where no past performance is shown there was insufficient data available in that year to provide performance.
- Sub-Fund launch date: 2023.
- Share Class launch date: 2023.
