The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

YieldMax™ Big Tech Option Income UCITS ETF (the Fund) –

ISIN: IE000MMRLY96

Distributing ETF Share Class

A sub-fund of HANetf II ICAV. Managed by HANetf Management Limited (the **Manager**)

Objectives and Investment Policy

The Fund aims to achieve capital growth through exposure to a portfolio of equities from the technology sector and income through the associated dividends and option premiums

In order to achieve its investment objective, the Fund will aim to:

- (i) invest at least 80% of its assets in a portfolio of equities or equity related securities, such as global depositary receipts (GDR) and American depositary receipts (ADR) of large capitalisation companies from the technology and technology related sectors;
- (ii) seek additional income through the implementation of option income strategies based upon listed call options. The Investment Manager will select constituents from the 200 largest, by market capitalisation, listed companies in the technology and technology related sectors.

The Investment Manager will implement option strategies using listed call options on an underlying security to generate additional income. The two types of option income strategies which will be followed, will be either a traditional covered call strategy and a covered call spread strategy. The strategy

adopted, will depend on market conditions and the ability to generate income on an underlying security.

Investment Policy: The Fund employs an active management investment approach in order to achieve its investment objective.

Dealing: Shares of the Fund (**Shares**) are listed on one or more stock exchanges. Typically, only authorised participants (i.e. brokers) can purchase Shares from or sell Shares back to the Fund. Other investors can purchase and sell Shares on exchange on each day the relevant stock exchange is open.

Distribution policy: Income generated by the Fund's investments will be distributed monthly in respect of the Shares of this class.

Recommendation: This Fund may not be appropriate for short-term investment.

Currency: The base currency of the Fund is US Dollar. For full investment objectives and policy details, please refer to the Supplement.

Risk and Reward Profile

The categorisation above is not guaranteed to remain unchanged and may shift over time.

The lowest category (1) does not imply a risk-free investment.

The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.

The categorisation above (6) is due to the nature of the Fund's investments and risk associated with those investments, including:

- The value of underlying securities can be affected by daily financial market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- There is no assurance that any appreciation in the value of investments will occur, or that the investment objective of the Fund will be achieved.
- **Active Management Risk:** The Fund's assets will be actively managed by the Investment Manager who will have discretion (subject to the Fund's investment restrictions) to invest the Fund's assets in investments that it considers will enable the Fund to achieve its investment objective. There is

no guarantee that the Fund's investment objective will be achieved based on the investments selected.

- **Covered Call Options Strategy Risk:** While the Fund uses a covered call option strategy which is intended to provide income, there is no guarantee that the derivative strategy will achieve this. The Fund may forego some capital appreciation potential, while retaining the risk of loss should the price of the underlying securities decline. Selling call options will create exposure for the Fund, as it may have to deliver the underlying securities or their value and, should the market move unfavourably, this may result in an unlimited loss. The maximum loss for the seller of a call option is potentially unlimited if the option seller does not hold the underlying securities which underlies the options.
- **Derivatives risk:** Derivatives can behave unexpectedly. The pricing and volatility of derivatives may diverge from pricing and volatility of their underlying references
- **Sector Concentration Risk:** To the extent that the Fund invests a significant portion of its assets in the securities of companies of a particular sector, it is more likely to be impacted by events or conditions affecting that sector. The fund will aim to invest a large percentage of its assets in the technology and technology related sectors

Risks not covered by the indicator, but which are materially relevant

to the Fund include:

- **Liquidity on secondary market risk:** There can be no certainty that Shares can always be bought or sold on a stock exchange or that the market price will reflect the NAV of the Fund.
- **Currency Risk:** The Fund may invest in securities denominated in currencies other than the base currency. Changes in the exchange rates may adversely affect the performance of the fund.

It may be difficult for the Fund to buy or sell certain investments in some market conditions. Consequently, the price obtained when the Fund buys or sells securities may compare adversely to the price under normal market conditions.

For a complete overview of all risks attached to this Fund, refer to the section entitled “**Risk Factors**” in the Supplement and the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
