

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Future of Defence UCITS ETF (the Fund) –

ISIN: IE000OJ5TQP4

Accumulating ETF Share Class

A sub-fund of HANetf ICAV. Managed by HANetf Management Limited (the **Manager**)

Objectives and Investment Policy

The Fund seeks to track the price and the performance, before fees and expenses, of the EQM Future of Defence Index (the “**Index**”).

The Index is governed by a published, rules-based methodology and is designed to measure the performance of a global investable universe of publicly listed companies, headquartered in NATO+ countries that generate revenues from the defence (including cyber defence) sector.

To be eligible for inclusion in the Index, companies shall:

- be headquartered in NATO+ countries, and derive more than 50% of their revenues from the manufacture and development of military aircraft and/or defence equipment or cyber security contracting with a NATO+ member nation verified by publicly available contract information.
- meet certain minimum market capitalisation and liquidity requirements, and be in compliance with the United Nations Global Compact (UNGC) principles and Organisation for Economic Cooperation (OECD) Guidelines for Multinational Enterprises.

The Index is rebalanced on a quarterly basis.

Replication: The Fund will employ a "passive management" (or indexing) investment approach and will seek to employ a replication methodology, meaning insofar as possible and practicable, it will invest in all of the securities comprising the Index.

Dealing: Shares of the Fund (“**Shares**”) are listed on one or more stock exchanges. Typically, only authorised participants (e.g. brokers) can purchase Shares from or sell Shares back to the Fund. Other investors can purchase and sell Shares on exchange on each day the relevant stock exchange is open.

Distribution policy: Income received by the Fund’s investments will not be distributed in respect of the Shares of this class. Instead, it will be accumulated and reinvested on behalf of the shareholders of the Fund.

Recommendation: This Fund may not be appropriate for short-term investment.

Currency: The base currency of the Fund is US Dollar.

For full investment objectives and policy details, please refer to the supplement to the prospectus for the Fund (the “**Supplement**”).

Risk and Reward Profile

The categorisation above is not guaranteed to remain unchanged and may shift over time.

The lowest category (1) does not imply a risk-free investment.

The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.

The categorisation above (6) is due to the nature of the Fund’s investments and risk associated with those investments, including:

- The value of underlying securities can be affected by daily financial market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- There is no assurance that any appreciation in the value of investments will occur, or that the investment objective of the Fund will be achieved.
- **US Political Risks:** The geographic focus of the Fund is linked to NATO membership and designation under US law of major non-NATO ally (**MNNA**) status. MNNA status of any country may be affected by changes in US government policies and political developments. The Fund’s investments may therefore be subject to change depending on these developments.
- **Sectoral Risk – Defence Sector:** Where a Fund invests a

significant portion of its assets in the securities of companies of a sector, it is more likely to be impacted by events or conditions affecting that sector. The Fund shall invest predominantly in companies in the defence sector, including related sectors such as cyber security. The defence industry can be significantly affected by government regulation and spending policies because companies involved in this industry rely, to a significant extent, on government demand for their products and services. The financial condition of these companies is heavily influenced by government defence spending, which may be reduced in efforts to control government budgets.

- **Smaller companies:** Shares in smaller companies are typically less liquid and experience greater price variations than larger companies.

- **Currency risk:** The Fund invests in securities denominated in currencies other than its base currency. Changes in the exchange rates may adversely affect the performance of the Fund.

Risks not covered by the indicator, but which are materially relevant to the Fund include:

- **Tracking error risk:** The Fund’s performance may not exactly track the Index. This can result from market fluctuations, changes in the composition of the Index, transaction costs, the costs of making changes to the Fund’s portfolio and other Fund expenses.

- **Liquidity on secondary market risk:** There can be no certainty that Shares can always be bought or sold on a stock exchange or that the market price will reflect the NAV of the Fund.
- For a complete overview of all risks attached to this Fund, refer to the section entitled "Risk Factors" in the Supplement and the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
