

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest. Terms not defined herein are as defined in the Prospectus.

SPDR J.P. Morgan Saudi Arabia Aggregate Bond UCITS ETF (the "Fund"), a sub-fund of SSGA SPDR ETFs Europe I plc (a UCITS compliant Exchange Traded Fund). This Fund is managed by State Street Global Advisors Europe Limited.

Share Class: SPDR J.P. Morgan Saudi Arabia Aggregate Bond UCITS ETF (Acc) (ISIN IE000QRDCYW2)

Objectives and Investment Policy

Investment Objective The investment objective of the Fund is to track the performance of liquid, USD-denominated sovereign and quasi-sovereign instruments and SAR-denominated Sukuk government bonds from Saudi Arabia.

Investment Policy The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index. The Index measures the performance of the liquid, USD-denominated sovereign and quasi-sovereign instruments and SAR-denominated Sukuk government bonds from Saudi Arabia. The Index includes USD-denominated fixed-rate, floating and zero-coupon bonds, capitalization/amortizing bonds and bonds with callable, puttable, or convertible features. In addition, SAR-denominated Sukuk government bonds issued after January 1st, 2023 are eligible for inclusion. USD and SAR denominated bonds have to satisfy the minimum amount outstanding criterion of \$500 million and \$1 billion, respectively. At each month-end, instruments that fall below 6 months to maturity during the upcoming month, will be excluded from the Index. Index constituents may on occasion be rebalanced more often than the Index Rebalance Frequency, if required by the Index methodology, including for example where corporate actions such as mergers or acquisitions affect components of the Index. The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest using a stratified sampling strategy as further described in the "Investment Objectives and Policies – Index Tracking Funds" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the Investment Restrictions set forth in the Prospectus. The Investment Manager and/or Sub-Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. The bond securities in which the Fund invests will be primarily

listed or traded on Recognised Markets in accordance with the limits set out in the UCITS Regulations. Details of the Fund's portfolio and the indicative net asset value per share for the Fund are available on the Website daily.

The Fund may use financial derivative instruments (that is, financial contracts whose prices are dependent on one or more underlying assets) in order to manage the portfolio efficiently.

Save in exceptional circumstances, the Fund will generally only issue and redeem shares to certain institutional investors. However, shares of the Fund may be purchased or sold through brokers on one or more stock exchanges. The Fund trades on these stock exchanges at market prices which may fluctuate throughout the day. Market prices may be greater or less than the daily net asset value of the Fund.

Shareholders may redeem shares on any UK business day (other than days on which relevant financial markets are closed for business and/or the day preceding any such day provided that a list of such closed market days will be published for the Fund on www.ssga.com); and any other day at the Directors' discretion (acting reasonably) provided Shareholders are notified in advance of any such days.

Any income earned by the Fund will be retained and reflected in an increase in the value of the shares.

The Fund does not currently engage in securities lending.

The Shares of the USD Class are issued in U.S. Dollar.

Please refer to the Prospectus for more information.

The J.P. Morgan Saudi Arabia Aggregate Index is used with permission and is the exclusive property of JPMorgan Chase & Co. (Index Provider). The SPDR J.P. Morgan Saudi Arabia Aggregate Bond UCITS ETF is not sponsored, endorsed or otherwise promoted by the Index Provider. Please refer to the SPDR J.P. Morgan Saudi Arabia Aggregate Bond UCITS ETF supplement for full disclaimer.

Risk and Reward Profile

Risk Disclaimer The risk category above is not a measure of capital loss or gains but of how significant the rises and falls in the Fund's return have been historically.

For example a fund whose return has experienced significant rises and falls will be in a higher risk category, whereas a fund whose return has experienced less significant rises and falls will be in a lower risk category. The lowest category (i.e., category 1) does not mean that a fund is a risk free investment.

As the Fund's risk category has been calculated using historical simulated proxy data, it may not be a reliable indication of the Fund's future risk profile. The Fund's risk category shown is not guaranteed and may change in the future.

Why is this Fund in this category? The Fund is in risk category 4 as its return has experienced medium rises and falls historically.

The following are material risks relevant to the Fund which are not adequately captured by the risk category.

Index Tracking Risk: The Fund's return may not match the return of the Index. It is currently anticipated that the Fund will track the Index with a potential variation of up to 1% annually under normal market conditions. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager and/or Sub-Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Liquidity Risk & ETF Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis. Where the fund invests in illiquid securities or does not trade in large volumes, the bid offer spreads of the Fund may widen, the Fund may be exposed to increased valuation risk and reduced ability to trade. Shares in the Fund may also trade at prices that are materially different to the last available NAV.

Duration / Interest Rate Risk: Changes in interest rates are likely to affect the value of bonds and other debt instruments. Rising interest rates generally result in a decline in bond values, while falling interest rates generally result in bond values increasing. Investments with longer maturities and higher durations are more sensitive to interest rate changes, therefore a change in interest rates could have a substantial and immediate negative effect on the values of the Fund's investments.

Concentration Risk: When the Fund focuses its investments in a particular currency or region, the financial, economic, business, and other developments affecting issuers in that currency or region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a currency or region in which the Fund focuses its investments.

Emerging Markets Risk: Risks of investing in emerging markets include, among others, greater political and economic instability, possible trade barriers, less governmental supervision and regulation, greater volatility in currency exchange rates, currency transfer restrictions or difficulties in gaining currency exposure, less developed securities markets, legal systems and financial services industries, differences in auditing and financial reporting standards, and greater dependence on revenue from particular commodities or international aid. As the Fund has material exposure to emerging markets, an investment in the Fund should not constitute a

substantial proportion of an investment portfolio and may not be appropriate for all investors.

Sukuk Investment Risk: Price changes in Sukuk / Sharia law compliant instruments are influenced predominantly by the value of the underlying asset. Factors that may impact the value of the underlying asset include volatility and interest rate levels. Price changes in Sukuk may also be influenced by interest rate developments in the capital markets, which in turn are influenced by macro-economic factors. Sukuk may be issued by any corporate, sovereign, or supranational entity and may be backed or derive its value from any asset, tangible or otherwise, including home financings. Sovereign Sukuk ("Sovereign Sukuk") are Sukuk issued or guaranteed by governments or government-related entities. Investment in Sovereign Sukuk issued or guaranteed by governments or their agencies and instrumentalities ("Governmental Entities") may involve a higher degree of risk than

conventional governmental bonds due to their geographical concentration. Where the Fund invests in Sovereign Sukuk issued by governments or Governmental Entities from emerging countries it will bear additional risks linked to the specifics of such countries (e.g. currency fluctuations, political and economic uncertainties, repatriation restrictions, change of law etc.) as further detailed under the "Emerging Markets Risk" section of the Supplement. An active secondary market in respect of the Sukuk that the Fund invests in may never be established or may be illiquid and this would adversely affect the value at which the Fund could sell such Sukuk. There can be no assurance that there will be no interruption to, or errors in, trading, clearing or settlement of Sukuk that are listed on the Saudi Stock Exchange. Please refer to the Prospectus for full details about the risks associated with this Fund.

Charges

The charges you pay are used to pay the cost of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases, you might pay less – you can find this out from your financial advisor or distributor. Entry and exit charges are not applicable to investors buying/selling shares of the Fund on stock exchanges, but these investors will do so at market prices and may be subject to broker fees and/or other charges.

The ongoing charges figure shown here is an estimate of the charges. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another fund

For more information about charges please refer to the "Fees and Expenses" section of the prospectus and the Fund supplement.

One-off charges taken before or after you invest

Entry charge	none
Exit charge	none

This is the maximum that might be taken out of your money before it is invested (entry charge) or before the proceeds of your investment are paid out (exit charge).

Charges taken from the Fund over a year

Ongoing charge	0.37%
----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	none
-----------------	------

Past Performance

Past performance is not a guide to future results. The Fund was launched in December 2024. The Share Class was launched in December 2024.
