

### Key Investor Information for Investors in the United Kingdom

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Xtrackers USD Corporate Green Bond UCITS ETF

**Share class: 1D - GBP Hedged, ISIN: IE000X63FXN4, Security code: DBX0QX, Currency: GBP**

a sub-fund of Xtrackers (IE) plc. The management company is DWS Investment S.A., a member of the DWS Group.

### Objectives and investment policy

The fund is passively managed. **INVESTMENT OBJECTIVE:** The aim is for your investment to reflect the performance of the Bloomberg MSCI USD Corporate and Agency Green Bond Index (index), while seeking to minimise foreign currency fluctuations at share class level. **DESCRIPTION OF INDEX:** The index aims to reflect the performance of certain types of US Dollar-denominated investment grade tradable debt (bonds) issued by corporate and agency issuers to fund projects with direct environmental benefits and that meet specific credit quality and liquidity requirements. In order to be eligible for inclusion in the index, the issuers of the bonds must meet certain ESG screening criteria. **ESG CRITERIA:** Bonds which breach the following ESG standards, amongst others, are excluded: (i) are associated with controversial, civilian, conventional and nuclear weapons and tobacco, (ii) are assigned an MSCI ESG Rating of CCC, (iii) derive revenues from thermal coal and oil sands extraction and military defence weapons, and (iv) are assigned an MSCI ESG Controversies Score of 0 (red flag). Bonds must also meet the green bond eligibility criteria as independently evaluated by MSCI ESG Research, including: (i) stated use of proceeds, (ii) process for green project evaluation and selection, (iii) management of proceeds, and (iv) ongoing reporting of environmental performance of the use of proceeds. **INDEX REBALANCING, CALCULATION AND ADMINISTRATION:** The index is reviewed and rebalanced monthly, where the weight of

each issuer in the index is capped at a maximum 5% of the market value of the index. The index is calculated on a total return basis. This means that all interest payments received from bonds are reinvested in the index. **INVESTMENT POLICY:** To achieve the aim, the fund will i) attempt to replicate the index, before fees and expenses, by buying a portfolio of securities that may comprise the constituents of the index or other unrelated investments as determined by DWS entities and ii) enter into financial contracts (derivatives) which attempt to reduce the effect of exchange rate fluctuations between the currency of the fund's assets and the currency of your shares. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of derivatives. **FURTHER INFORMATION:** Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at [www.Xtrackers.com](http://www.Xtrackers.com). Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 1 per cent. The currency of the fund is USD. The fund distributes up to four times per annum. You may request the redemption of shares generally on a daily basis.

### Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 4 because its share price fluctuates and the likelihood of both losses and gains may therefore be relatively high. The following risks could be of particular significance for the fund: The fund will attempt to replicate the performance of the index less costs, but your investment is not expected to match the performance of the index precisely. **EXCEPTIONAL CIRCUMSTANCES RISK:** Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the fund's performance to be substantially different from the performance of the index. **CONFLICTS OF INTEREST RISK:** DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. **NO GUARANTEE RISK:** The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. **CURRENCY RISK:** Fluctuations in interest rates of the currency of the shares, the index or the other assets of the fund may affect the value of your investment. **BONDS RISK:** The index provides a notional exposure to the value and/or return of certain bonds which may fall. Markets in these asset classes may at times become volatile or illiquid. This

means that ordinary trading activity may occasionally be disrupted or impossible. The index may be affected. **SUSTAINABILITY RISK:** The environmental, social and governance screening criteria are embedded with the index selection process, which seeks to exclude bonds issued by companies involved in certain activities. The investment manager and sub-portfolio manager are not responsible for monitoring the screening process or green bond eligibility standards or confirming that all bonds which pass the screening process or green bond eligibility standards are issued by companies with adequate environmental, social or governance standards. The company is solely relying on the activities conducted by and information provided by the administrator of the index and MSCI ESG Research LLC for the ESG screening. ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the index administrator may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the index. **DERIVATIVES RISK:** The fund may use derivatives to i) try to manage its investments more efficiently, and ii) try to reduce movements in currency exchange rates between the currency of the fund's assets and the currency of the fund's shares. This may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investment. **CREDIT RISK & INTEREST RATE RISK:** The fund may invest in bonds which are exposed to credit risk and interest rate risk. Credit risk means that there is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. Interest rate risk means that if interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment. A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

### Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest
