Objectives and Investment Policy

The fund aims to achieve income growth over the medium to long term.

The Fund will invest, in a manner consistent with the UCITS Regulations and Central Bank requirements, in a portfolio of fixed income securities of Latin American issuers which are listed or traded on a Regulated Market as set out in Appendix 1 of the Prospectus. The Investment Manager will select the fixed income securities with a view to generating income, buying securities below fair value and avoiding defaults. The investment process is ultimately intended to provide steady investment income to investors.

The Fund may also invest in contingent convertible instruments (CoCo Bonds), also known as “CoCos”. CoCos are a form of hybrid

debt instrument intended to either convert into equity or have their principal partially or completely written off with the option of revaluation under certain circumstances. Such instruments may be senior and/or subordinated. Investment in, or exposure to, CoCos will be limited to 10% of the Fund's net assets.

Investment Policy: The Fund employs an active management investment approach in order to achieve its investment objective.

Dealing: Shares of the Fund (“Shares”) are listed on one or more stock exchanges. Typically, only authorised participants (i.e. brokers) can purchase Shares from or sell Shares back to the Fund. Risk and Reward Profile

The categorisation above is not guaranteed to remain unchanged and may shift over time.

The lowest category (1) does not imply a risk-free investment.

The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.

The categorisation above (4) is due to the nature of the Fund's investments and risk associated with those investments, including:

- There is no assurance that any appreciation in the value of investments will occur, or that the investment objective of the Fund will be achieved.
- High-Yield Fixed-Income securities risk:** High-yield fixed-income securities are fixed-income securities rated below investment grade as classified by any of Standard & Poor's, Moody's or Fitch rating agencies, or an internal rating determined by the Investment Manager. High-yield fixed-income securities are subject to additional risk factors, such as increased possibility of default, illiquidity of the security, and

changes in value based on public perception of the issuer. These securities are generally considered speculative because they present a greater risk of loss, including default, than higher quality debt securities.

- Coupon cancellation risk:** Coupon payments on some CoCo Bonds are entirely discretionary and may be cancelled by the issuer at any point, for any reason, and for any length of time. The discretionary cancellation of payments is not an event of default and there are no possibilities to require re-instatement of coupon payments or payment of any passed missed payments. Coupon payments may also be subject to approval by the issuer's regulator and may be suspended in the event there are insufficient distributable reserves.
- CoCo Bond risk:** The Fund will invest in CoCos which are a form of hybrid debt security that are intended to either convert into equity or have their principal written down upon the occurrence of certain triggers. These triggers include but are not limited to: (i) an issuer failing to meet a specified minimum capital level; (ii) an issuer's regulator questioning the continued validity of the issuer as a going concern; (iii) an issuer's regulator stating that the security should be converted

or written down, partially or wholly; (iv) an issuer receiving specified levels of extraordinary public support.

- **Active management risk:** The Fund's assets will be actively managed by the Investment Manager who will have discretion (subject to the Fund's investment restrictions) to invest the Fund's assets in investments that it considers will enable the Fund to achieve its investment objective. There is no guarantee that the Fund's investment objective will be achieved based on the investments selected.

Risks not covered by the indicator, but which are materially relevant to the Fund include:

- **Liquidity on secondary market risk:** There can be no certainty that Shares can always be bought or sold on a stock exchange or that the market price will reflect the NAV of the Fund.

For a complete overview of all risks attached to this Fund, refer to the section entitled "Risk Factors" in the Supplement and the Prospectus.
