iShares MSCI USA Small Cap ESG Enhanced

UCITS ETF

A sub-fund of iShares VII plc

USD (Acc) Share Class

ISIN: IE00B3VWM098

Exchange Traded Fund (ETF)

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Share Class is a share class of a Fund which aims to achieve a return on your investment which reflects the return of the MSCI USA Small Cap ESG Enhanced Focus CTB Index, the Fund’s benchmark index (Index).
- ▶ The Share Class, via the Fund, is passively managed and aims to invest so far as possible and practicable in the equity securities (e.g. shares) that make up the Index.
- ▶ The Index measures the performance of a sub-set of equity securities within the MSCI USA Small Cap Index (Parent Index) and excludes companies from the Parent Index based on the index provider’s environmental, social and governance (ESG) exclusionary criteria. The remaining companies are then weighted by the index provider using an optimisation process which aims to exceed decarbonisation targets and other minimum standards for an EU Climate Transition Benchmark (as further described in the Fund’s prospectus) and maximise exposure to issuers with higher ESG ratings, whilst targeting a similar risk profile and capping the tracking error of the Index, each in relation to the Parent Index.
- ▶ Companies may be excluded from the Index if they are involved with controversial, conventional, and nuclear weapons, civilian firearms, thermal coal, tobacco, or unconventional oil and gas. Companies that are classified as violating the United Nations Global Compact principles, have a ‘Red’ MSCI ESG Controversies score, or have not been assessed by the index provider for an ESG controversies score or an ESG rating, are also excluded from the Index.
- ▶ The Fund may obtain limited exposure to securities considered not to satisfy these ESG criteria.
- ▶ The Fund adopts a binding and significant ESG optimisation approach to sustainable investing. This means that the Fund will integrate ESG information into its investment process to optimise exposure to issuers to achieve a higher ESG rating and reduce exposure to carbon emissions compared to the Parent Index while meeting optimisation constraints
- ▶ The Parent Index measures the performance of small capitalisation stocks of the US equity markets which comply with MSCI’s size, liquidity and free-float criteria.
- ▶ The Fund uses optimising techniques to achieve a similar return to the Index. These techniques may include the strategic selection of certain securities that make up the Index or other securities which provide similar performance to certain constituent securities. These may also include the use of financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets). FDIs may be used for direct investment purposes.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund.
- ▶ Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- ▶ Your shares will be accumulating shares (i.e. income will be included in their value).
- ▶ Your shares will be denominated in US Dollar, the Fund’s base currency.
- ▶ The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded. Indicative net asset value is published on relevant stock exchanges websites.

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of this Share Class.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Share Class is rated seven due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.
 - Shares in smaller companies typically trade in less volume and experience greater price variations than larger companies.

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund’s investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs including, on redemptions, any applicable capital gains tax (CGT) and other taxes on underlying securities.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund's prospectus. This figure excludes portfolio trade related costs, except costs paid to the depository and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
