iShares Broad € High Yield Corp Bond

UCITS ETF

A sub-fund of iShares III plc

EUR (Dist) Share Class

ISIN: IE00BG0J4B71

Exchange Traded Fund (ETF)

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Share Class is a share class of the Fund which aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the ICE BofAML Euro High Yield Constrained Index, the Fund's benchmark index (Index).
- ▶ The Share Class, via the Fund, aims to invest so far as possible and practicable in the fixed income (FI) securities (such as bonds) that make up the Index and comply with its credit rating requirements. If the credit rating of the FI securities are upgraded or become unrated, such that they are no longer eligible for inclusion in the Index, the Fund may continue to hold these until they cease to form part of the Index and it is practicable to sell the position.
- ▶ The Index measures the performance of the ICE BofAML Euro High Yield Index (the "Parent Index") but applies a 3% cap to issuer concentration levels. The Index measures the performance of Euro denominated, fixed rate sub-investment grade (based on an average rating of Moody's, S&P and Fitch) (i.e. meet a specified level of creditworthiness) corporate FI securities publicly issued in the Euro domestic market or Eurobond market. To be eligible for inclusion in the Index, the FI securities must have at least 18 months to final maturity at the time of issuance, at least one year remaining term to final maturity as of the Index's rebalancing date, a fixed coupon (i.e. interest) schedule and a minimum amount outstanding of Euro 250 million. Zero coupon bonds (i.e. bonds that do not pay interest) are also eligible for inclusion in the Index. The Index is market capitalisation weighted, rebalances on a monthly basis and individual issuers are capped at 3% of index weight. Market capitalisation is the market value of the outstanding bond issuance. Issuers that exceed the limit are reduced to 3% and the weighting of each of their FI securities is adjusted on a pro-rata basis. Similarly, the weighting of FI securities of all other issuers that fall below the 3% cap are increased on a pro-rata basis. If there are fewer than 34 issuers in the Index, each issuer will be equally weighted and the weighting of their respective bonds will be increased or decreased on pro-rata basis.
- ▶ The Fund uses optimising techniques to achieve a similar return to its index. These techniques may include the strategic selection of certain securities that make up the Index or other securities which provide similar performance to certain constituent securities. These may also include the use of financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets). FDIs may be used for direct investment purposes.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund.
- ▶ Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- ▶ Your shares will be distributing shares (i.e. income will be paid on the shares semi-annually).
- ▶ Your shares will be denominated in Euro, the Fund's base currency.
- ▶ The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded. Indicative net asset value is published on relevant stock exchanges websites.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Share Class.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Share Class is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.
 - Non-investment grade fixed income securities are more sensitive to changes in interest rates and present greater 'Credit Risk' than higher rated fixed income securities.
 - ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs including, on redemptions, any applicable capital gains tax (CGT) and other taxes on underlying securities.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund's prospectus. This figure excludes portfolio trade related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
