

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

PIMCO

PIMCO Emerging Markets Advantage Local Bond Index UCITS ETF

A sub-fund of PIMCO ETFs plc
PIMCO Global Advisors (Ireland) Limited, part of Allianz, manages this fund.

ISIN: IE00BH3X8336
Share class: USD Income

Objectives and Investment Policy

Objective The fund aims to provide the performance of the PIMCO Emerging Markets Advantage Local Currency Bond Index (the "Reference Index").

Investment Policy The Reference Index is a gross domestic product ("GDP") weighted benchmark for local emerging market government debt, subject to a maximum exposure of 15% per country. The particular countries and their weighting are determined annually. Qualifying countries must have a minimum average sovereign rating of BB- (with such ratings provided by recognised rating agencies). The fund invests a substantial portion of its assets in a diversified portfolio of emerging market local government debt.

The fund will attempt to achieve its objectives by investing primarily in a range of non-USD denominated fixed income securities (which are loans that pay a fixed or variable rate of interest). The fund may invest in "investment grade" and "non-investment grade" securities. "Investment grade" securities typically produce a lower level of income than "non-investment grade" securities and are also considered to be of lower risk. The fund will invest in emerging markets, which in investment terms are those economies that are still developing.

The fund may invest in derivative instruments (such as futures, options and swaps) rather than directly in the underlying securities themselves. The derivatives return is linked to movements in the underlying assets.

The fund is passively managed (i.e. tracks the Reference Index).

For full investment objectives and policy details please refer to the prospectus.

Distribution Policy This share class pays out a distribution of any investment income generated by the fund. You may elect for this to be reinvested into the fund.

Dealing Day The fund's net asset value is calculated daily and the fund

is open for redemptions on each business day in England. Please refer to the prospectus for further information. The fund shares are listed on one or more Stock Exchanges. As the fund is an exchange traded fund ("ETF"), in normal market conditions typically only authorised participants may subscribe or redeem shares directly with the fund. Other investors can buy or sell shares daily through an intermediary directly or on stock exchanges on which then shares are traded, i.e. on the secondary market. In exceptional circumstances, other investors will be permitted to redeem their shares directly from the Company in accordance with the redemption procedures set out in the prospectus, subject to applicable laws and any relevant charges.

Fund's Base Currency US Dollars.

Risk and Reward Profile

This rating is not a measure of the risk of capital loss, but a measure of the fund's price movement over time. This rating:

- is based on historical data, which may be comparative, and may not be representative of future rating.
 - as a result, this risk estimation may not be a reliable indicator of future risk and may be subject to change over time.
 - is classified in the category indicated above due to its past behaviour, which may be comparative. The lowest category does not mean risk free investment.
 - is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment.
- does not provide its investors with any guarantee on performance, nor on the performance of monies invested in it.

Main risks not covered by the above indicator which could negatively affect the net asset value of the fund:

Index Tracking Risk Fund performance can potentially deviate from the reference index due to market conditions, transaction costs and different replication techniques such as optimization & sampling.

Credit and Default Risk A decline in the financial health of an issuer of a fixed income security can lead to an inability or unwillingness to repay a loan or meet a contractual obligation. This could cause the value of its bonds to fall or become worthless. Funds with high exposures to non-

investment grade securities have a higher exposure to this risk.

Currency Risk Changes in exchange rates may cause the value of investments to decrease or increase.

Derivatives and Counterparty Risk The use of certain derivatives could result in the fund having a greater or more volatile exposure to the underlying assets and an increased exposure to counterparty risk. This may expose the fund to larger gains or losses associated with market movements or in relation to a trade counterparty being unable to meet its obligations.

Emerging Markets Risk Emerging markets or less developed countries may face more political, economic or structural challenges adding to risk in the fund.

Fixed Income Risk There is a risk that the institution which issued the securities will fail, which would result in a loss of income to the fund. Fixed income values are likely to fall if interest rates rise.

Risk of Using Derivatives In order to reach its investment objective, the fund may use swaps, including futures and forwards. Such derivatives may result in gains or losses that are greater than the original amount invested.

Liquidity Risk Difficult market conditions could result in certain securities becoming hard to sell at a desired time and price.

Interest Rate Risk Changes in interest rates will usually result in the values of bond and other debt instruments moving in the opposite direction (e.g. a rise in interest rates likely leads to fall in bond prices).

China InterBank Bond Market ("CIBM") The fund may be exposed to liquidity risks, settlement risks, default of counterparties and market volatility associated with CIBM. In addition, the CIBM rules are new and still subject to further clarification and/or changes, which may adversely affect the fund's capability to invest in the CIBM.

For more information on risks, please see the fund prospectus which is available at www.pimco.com.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	3.00% *
Exit charge	3.00% *
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.39%
Charges taken from the fund under certain specific conditions	
Performance fee	None

*Because the fund is an ETF, investors will typically only be able to buy or sell shares in the secondary market. The entry and exit charges outlined here are not applicable to such secondary market investors. However, secondary market investors may incur brokerage and / or transaction fees in connection with their dealings. Secondary market investors may also bear the costs of "bid-ask" spreads; meaning the difference between the prices at which shares can be bought and sold. You should discuss these fees and costs with your financial advisor or broker before you invest, as they may reduce the amount of your initial investment and the amount you receive on disposal.

The entry charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial advisor.

The ongoing charges figure is based on expenses for the year ending 2024. This figure may vary from year to year.

For more information on charges, please see the relevant charges section in the fund prospectus which is available at www.pimco.com.

Past Performance

- Past performance is not an indicator of future returns.
- The impact of charges and fees on the performance has been included.
- The performance of the class is calculated in US dollars.
- The fund launched in September 2011. This class started to issue shares in January 2014.

Practical Information

Depository State Street Custodian Services (Ireland) Limited.

Prospectus and Further Information Further information on the fund or other share classes or sub-funds of the Company, including the prospectus, the most recent annual report and subsequent semiannual reports of the Company, may be obtained from the Administrator, as are the latest share prices.
