

## Franklin Sustainable Euro Green Bond UCITS ETF

**Class EUR (Acc) • ISIN IE00BHZZRR253** • A sub-fund of Franklin Templeton ICAV  
The management company is Franklin Templeton International Services S.à r.l.

### Objectives and Investment Policy

Franklin Sustainable Euro Green Bond UCITS ETF (the "**Fund**") aims to provide exposure to the European green bond market, whilst maximising total returns.

#### Investment Policy

The Fund invests a minimum of 75% in corporate and government green bonds (bonds whose proceeds finance environmental projects) denominated in or hedged to European currencies. These investments may be of any duration, both investment and below investment grade and have fixed or floating rates.

To a lesser extent, the Fund may invest in bonds that are deemed by the Investment Manager to be supportive of a low-carbon future.

The Fund may also invest in perpetual bonds, convertible securities, including contingent convertible bonds, and asset- and mortgage-backed securities.

**Derivatives and techniques** The Fund may use derivatives for hedging, efficient portfolio management and investment purposes.

**Strategy** The investment manager uses macroeconomic and interest rate to identify eligible green bonds and securities that appear to offer the best return for their risk level.

**Sustainable investing** The investment manager applies a proprietary rating methodology using various ESG criteria in pursuing its sustainable objective. The Fund determines if securities and their issuers meet green bond standards and/or are contributing to a low-carbon economy and excludes or restricts investments in certain industries that are harmful to the environment or society, such as thermal coal, weapons and tobacco.

**SFDR category** Article 9 (sustainable investment objective under EU regulations).

For more information see [www.franklintempleton.ie/27850](http://www.franklintempleton.ie/27850)

**Base currency** Euro (EUR).

**Benchmark(s)** Bloomberg Global Aggregate EUR Green Bond Index. Used for performance comparison only.

The Fund is actively managed and may deviate materially from that of the benchmark(s).

#### Buying and selling shares

You may buy or sell shares daily through a broker on the stock exchange where the shares are traded. Authorised participants, such as selected financial institutions, may buy or sell shares directly with the fund, on any day markets are open for business in the United Kingdom.

#### Intended retail investor

Investors who understand the risks of the Fund and plan to invest for at least 3 to 5 years. The Fund may appeal to investors who:

- are looking for a combination of income and investment growth, through an investment that pursues a sustainable investment objective
- are interested in exposure to European green bond markets as part of a diversified portfolio
- have a medium risk profile and can tolerate moderate short-term changes in the share price

**Product availability** The Fund is available to all investors with at least basic investment knowledge, through all distribution channels, with or without the need for advice.

#### Terms to Understand

**bonds, below investment grade:** Bonds represent an obligation to repay a debt, along with interest. Below investment grade bonds generally pay higher interest rates but are considered less likely to make all scheduled payments or repay the initial debt.

**derivatives:** Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

**emerging markets:** Markets of less economically developed nations, such as some nations in Asia, Africa, Eastern Europe and Latin America.

**efficient portfolio management:** A strategy aimed at reducing risk, lowering costs or generating additional capital or income for the Fund through the use of derivatives. These strategies must align with the Funds risk profile.

**Share Class Currency:** EUR

**Treatment of Income:** For accumulation shares, income from investments is reinvested in the Fund and reflected in the price of shares.

### Risk and Reward Profile

#### What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

As the share class has no sufficient historical data available, simulated data based on a representative portfolio model or benchmark have been used instead.

#### Why is the Fund in this specific category?

The Fund invests mainly in green bonds whilst aiming to maintain capital preservation. Such securities have historically proven to present some stability over time and have benefitted from limited exposure to interest rates and movements in the bond market. As a result, the performance of the Fund can fluctuate over time.

#### Risks materially relevant not adequately captured by the indicator:

**Counterparty risk:** the risk of failure of financial institutions or agents (when serving as a counterparty to financial contracts) to perform their obligations, whether due to insolvency, bankruptcy or other causes.

**Credit risk:** the risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the Fund holds low-rated, sub-investment-grade securities.

**Foreign Currency risk:** the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

**Secondary market trading risk:** the risk that the shares purchased on the secondary market cannot usually be sold directly back to the Fund and that investors may therefore pay more than the NAV per share when buying shares or may receive less than the current NAV per Share when selling shares.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Considerations" section of the current prospectus of Franklin Templeton ICAV.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
