The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

L&G India INR Government Bond UCITS ETF

Share Class USD Distributing ETF - ISIN: IE00BL6K6H97. The Fund is a sub-fund of Legal & General UCITS ETF Plc (the "Company").
Managed by LGIM Managers (Europe) Limited, a member of the Legal & General group (the "Manager")

OBJECTIVES AND INVESTMENT POLICY

- The L&G India INR Government Bond UCITS ETF (the "Fund") is a passively managed exchange traded fund ("ETF") that aims to track the performance of the J.P. Morgan India Government Fully Accessible Route (FAR) Bonds Index (the "Index"), subject to the deduction of the ongoing charges and other costs associated with operating the Fund.
- Dealing.** Shares in this share class (the "Shares") are denominated in USD and can be bought and sold on stock exchanges by ordinary investors using an intermediary (e.g. a stockbroker). In normal circumstances, only Authorised Participants may buy and sell Shares directly with the Company. Authorised Participants may redeem their Shares on demand in accordance with the "Dealing Timetable" published on www.lgim.com.
- Index.** The Index is designed to provide exposure to INR-denominated government bonds that have been issued by the Indian central government and made eligible for investment to non-residents under the Fully Accessible Route (the "FAR"). The Index includes only FAR-eligible fixed rate and zero coupon bonds that are denominated in INR with a minimum issue size of US\$1 billion equivalent. Eligible securities shall have at least 2.5 years remaining to maturity on entry and at least 6 months remaining to maturity at each month end rebalance.
- Replication.** The Fund will primarily invest directly in the securities represented in the Index in similar proportions to their weightings in the Index. The fund may also invest in (1) companies that are not constituents of the Index that have similar risk and performance characteristics to the companies contained in the Index and (2) financial derivative instruments ("FDIs") (i.e. investments the prices of which are based on the companies contained in the Index and/or such other companies). Adjustments to the Fund's portfolio, including as a result of a reconstitution of the Index, will incur transaction costs.
- Dividend Policy.** This share class aims to pay semi-annual dividends out of the Fund's net income by electronic transfer.

RISK AND REWARD PROFILE

- The Fund is rated 4 due to the nature of its investments and its risks. The rating is calculated based on historical data and may not be a reliable indication of the Fund's future risk profile. The risk category may shift over time. The lowest category on the above scale does not mean "risk free".
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events. The fund may be impacted negatively by changes in taxation in India.
- Changes to interest rates will have a significant impact on bond prices and the Fund's value.
- If a bond issuer fails to make scheduled coupon payments or fails to repay the principal amount of a bond at maturity (i.e. is in "default"), this may significantly impact the Fund's value.

The risk and reward indicator may not take account of the following risks of

investing in the Fund :

- The Fund may have underlying investments that are valued in currencies that are different from USD, in which case exchange rate fluctuations will impact the value of your investment. In addition, the return in the currency of this share class may be different to the return in your own currency.
- Bond markets can be "illiquid" (i.e. have limited trading activity) which may mean that the Fund is not able to buy and sell bonds at fair prices.
- Third party service providers (such as counterparties entering into FDIs with the Fund or the Company's depository) may go bankrupt and fail to pay money due to the Fund or return property belonging to the Fund.
- If the Index provider stops calculating the Index or if the Fund's license to track the Index is terminated, the Fund may have to be closed.
- It may not always be possible to buy and sell Shares on a stock exchange or at prices closely reflecting the NAV.
- There is no capital guarantee or protection on the value of the Fund. Investors can lose all the capital invested in the Fund.

Please refer to the "Risk Factors" section of the Company's Prospectus and the Fund Supplement.
