SPDR MSCI USA Value UCITS ETF (the "Fund"), a sub-fund of SSGA SPDR ETFs Europe II plc (a UCITS compliant Exchange Traded Fund). This Fund is managed by State Street Global Advisors Europe Limited.
Share Class: SPDR MSCI USA Value UCITS ETF (ISIN IE00BSPLC520)

Objectives and Investment Policy

Investment Objective The investment objective of the Fund is to track the performance of US equities with a higher weighting applied to equities exhibiting low valuation characteristics.

Investment Policy The Fund seeks to track the performance of the MSCI USA Value Exposure Select Index (the "Index") as closely as possible.

The Fund is an index tracking fund (also known as a passively managed fund).

The Fund invests primarily in securities included in the Index. These securities include US large and mid-size companies that exhibit relatively higher value exposure within the parent index, the MSCI USA Index, while also seeking to avoid poor quality companies, as measured by their fundamental accounting data including Return on Equity, Debt to Equity and Earnings Variability.

The Fund seeks to hold all the securities of the Index with the approximate weightings as in that Index. The Fund will use a replication strategy to create a near mirror-image of the Index. In limited circumstances the Fund may purchase securities that are not included in the Index.

The Fund may use financial derivative instruments (that is, financial contracts whose prices are dependent on one or more underlying assets) in order to manage the portfolio efficiently.

Save in exceptional circumstances, the Fund will generally only issue and redeem shares to certain institutional investors. However, shares of the Fund may be purchased or sold through brokers on one or more stock exchanges. The Fund trades on these stock exchanges at market

prices which may fluctuate throughout the day. Market prices may be greater or less than the daily net asset value of the Fund.

The Fund's maximum exposure to securities lending as a percentage of its Net Asset Value will not exceed 40%.

Shareholders may redeem shares on any UK business day (other than days on which relevant financial markets are closed for business and/or the day preceding any such day provided that a list of such closed market days will be published for the Fund on www.ssga.com); and any other day at the Directors' discretion (acting reasonably) provided Shareholders are notified in advance of any such days.

Any income earned by the Fund will be retained and reflected in an increase in the value of the shares.

The Shares of the USD Class are issued in U.S. Dollar.

Please refer to the Prospectus for more information.

Risk and Reward Profile

Risk Disclaimer The risk category above is not a measure of capital loss or gains but of how significant the rises and falls in the Fund's return have been historically.

For example a fund whose return has experienced significant rises and falls will be in a higher risk category, whereas a fund whose return has experienced less significant rises and falls will be in a lower risk category.

The lowest category (i.e., category 1) does not mean that a fund is a risk free investment.

As the Fund's risk category has been calculated using historical data, it may not be a reliable indication of the Fund's future risk profile.

The Fund's risk category shown is not guaranteed and may change in the future.

Why is this Fund in this category? The Fund is in risk category 6 as its return has experienced very high rises and falls historically.

The following are material risks relevant to the Fund which are not adequately captured by the risk category.

Concentration Risk: When the Fund focuses its investments in a particular way, the issues affecting the investments will have a greater effect than if the Fund was more diversified. This concentration may also limit the Fund's liquidity.

Index Tracking Risk: The Fund's performance may not exactly track the Index. This can result from market fluctuations, changes in the composition of the Index, transaction costs, the costs of making changes to the Fund's portfolio and other Fund expenses.

Liquidity Risk & ETF Liquidity Risk: Lack of a ready market or resale restrictions may limit the Fund's ability to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount and may affect the ability to meet redemptions on a timely basis. Where the Fund invests in illiquid securities or does not trade in large volumes, the bid offer spreads may widen, the Fund may be exposed to increased valuation risk and reduced ability to trade. Shares in the Fund may also trade at prices materially different to the last available NAV.

Value Stock Risk: Value stocks may decline in price or never reach their expected full market value. Value stocks may underperform stocks in other broad style categories (and the stock market as a whole) over any period of time and may shift in and out of favour with investors generally, sometimes rapidly, depending on changes in market, economic and other factors.

Please refer to the Prospectus for full details about the risks associated with this Fund.
