Invesco Bloomberg Commodity Ex-Agriculture UCITS ETF (the "Fund")

A sub-fund of Invesco Markets plc (the "Umbrella Fund")

USD (ISIN: IE00BYXYX521) (the "Share Class")

The Fund is managed by Invesco Investment Management Limited, part of the Invesco Group.

Objectives and Investment Policy

- The Fund is a passively managed Exchange-Traded Fund ("ETF"), which aims to achieve the total return performance of the Bloomberg Ex-Agriculture and Livestock 20/30 Capped Index (the "Index")¹, less fees, expenses and transaction costs.
- To achieve the objective the Fund will use unfunded swaps ("Swaps"). These Swaps are an agreement between the Fund and an approved counterparty to exchange one stream of cash flows, against another stream. The Fund will not purchase commodities that comprise the index. The Fund holds a diversified basket of US Treasury Bills. The performance of the Index is swapped to the Fund in exchange for an agreed rate of return reflective of US Treasury Bill market rates. The Fund may be required to provide or receive collateral for any difference in the performance of the Index to the return of the US Treasury Bills.
- The Fund's shares are listed on one or more Stock Exchange(s). Investors can buy or sell shares daily through an intermediary directly or on Stock Exchange(s) on which the shares are traded. In exceptional circumstances investors will be permitted to redeem their shares directly from Invesco Markets plc in accordance with the redemption procedures set out in the prospectus, subject to any applicable laws and relevant charges.
- The Fund's base currency is USD.
- **Dividend Policy:** This Fund does not pay a dividend.
- **Net Asset Value:** This is calculated daily and the Fund is open for redemptions on each day on which the United States Federal Reserve System is open. Please refer to the prospectus for further information.
- **The Index:** The Index is designed to be a highly liquid and diversified benchmark for non-agricultural commodities. 11 commodities in three groups (energy, industrial metals and precious metals) are eligible for inclusion and constituents are selected on four main principles: economic significance, diversification, continuity and liquidity. The Index provides broad based exposure to non-agricultural commodities and no single commodity dominates the Index. The Index is rebalanced on an annual basis.

Risk and Reward Profile

- The Share Class is in risk category 6 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- **General Investment Risk:** The value of investments, and income from them, can go down as well as up and you may not get back the full amount you invested.
- **Emerging Markets Risk:** As a large portion of this fund is invested in less developed countries, investors should be prepared to accept a higher degree of risk than for an ETF that invests only in developed markets.
- **Use of Derivatives for Index Tracking Risk:** The Fund's ability to track the benchmark's performance is reliant on the counterparties to continuously deliver the performance of the benchmark in line with the swap agreements and would also be affected by any spread between the pricing of the swaps and the pricing of the benchmark. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- **Commodity Risk:** Exposure to commodities might result in the Fund being more impacted by natural disasters and tariffs or other regulatory developments. This may result in large fluctuations in the value of the Fund.
- **Synthetic ETF Risk:** The fund might purchase securities that are not contained in the reference index and will enter into swap agreements to exchange the performance of those securities for the performance of the reference index.
- For more information on risks, please see the Fund prospectus under "Risk Factors", which is available at etf.invesco.com (select your country and navigate to the Prospectus on the Documents section on the product page).
